Improve your mental math test results by playing our free mental math games. Apply your mental math tricks and post your high score on our leaderboards!

The format of Mental Arithmetic differs from that of traditional mental arithmetic materials in that pupils read the questions themselves, use rough paper for workings out, and write down their answers. It provides intensive practice in all areas of the maths curriculum.

The First Mental Arithmetic Answers book provides the correct answers to all the questions contained in the corresponding workbook. Answers to the Check-up tests are included, together with the photocopiable Group record sheets and an additional photocopiable Check-up.

The format of Mental Arithmetic differs from that of traditional mental arithmetic materials in that pupils read the questions themselves, use rough paper for workings out, and write down their answers. It provides intensive practice in all areas of the maths curriculum.

This photocopiable resource for Key Stage 2 is divided into two main parts. The first covers the important areas of mental maths, such as the four rules, fractions, decimals, money and time, and the second part presents associated topics to enable pupils to employ mental skills in contexts such as shape and measures. The work is at two levels of difficulty: National Curriculum Level 3, and Levels 4-5.

This series is designed to help teachers prepare for the National Tests at the end of each year and leading up to the final test at the end of KS2. Mental Maths for ages 5-6 contains eight photocopiable mental maths tests, reflecting the look and feel of the real tests. Accompanying the books is an audio CD which contains all the eight tests timed to the exact specifications of the actual test with set times for pupils to answer the questions. All that the teacher needs to do is turn on the CD player! Answers to all the tests are provided too.

The activities in this book are designed both to help children to learn and to understand math concepts, and also to prepare them for taking SATS papers at KS2. There is plenty of research evidence to suggest that children are helped in their understanding of math problems if teachers focus on common misconceptions, and if children are given opportunities for discussion and explanation of their own understanding. Children can also feel stigmatized by being made to focus on their own errors. Mike Spooner has developed activities that present already completed work which children then assess, correct and discuss - in this way they can analyze mistakes without damage to their own self-esteem. The activities are presented in the same format as the SATS papers, to give children practice in coping with that format. The book also contains writing frames that children can use to structure their discussions of math problems.
