Internship Benefits. MEI interns are presented with exciting opportunities to do real work and complete substantive assignments with personal guidance and hands-on training from their supervisors. All internships at the Middle East Institute are unpaid, though the Leadership Development Internship Program is packed with other benefits: Free language courses at the Institute in an intimate classroom setting with native-speaking professors (based on term/class enrollment)

Internships | Middle East Institute

For students, internships provide an opportunity to improve their skills and practical experience. At the same time, companies can take advantage of talented students who in turn might get an offer to join the company after graduation. Since students should look and apply for an internship by themselves, the overview listed below represents those companies that commonly provide open internship positions to Petroleum Engineering students at DPE.

Profiles jobs in engineering such as aerospace engineers, biomedical engineers, chemical engineers, nuclear engineers, software engineers, and more.

The emerging "green economy" consists of businesses and careers that focus on developing alternative energy sources, conserving natural resources, and protecting the environment. It includes a range of traditional jobs that are being expanded or modified to meet these goals as well as a variety of new jobs created in response to specific needs, and it has the potential to drive the creation of millions of new "green collar" careers in the coming years. The Green Careers series examines the key work areas in which green jobs are appearing. Each volume profiles 15 careers and provides all the basic information needed to understand the nature of the job: a history of the profession, key duties, education and training requirements, potential earnings, work environment, outlook for the future, and helpful resources. Box features and interviews provide further information.

This book provides a collection of the latest advances in engineering education in the Middle East and North Africa (MENA) region and sheds insights for future development. It is one of the first books to address the lack of comprehensive literature on undergraduate engineering curricula, and stimulates intellectual and critical discourse on the next wave of engineering innovation and education in the MENA region. The authors look at recent innovations through the lens of four topics: learning and teaching, curriculum development, assessment and accreditation, and challenges and sustainability. They also include analyses of pedagogical innovations, models for transforming engineering education, and methods for using technological innovations to enhance active learning. Engineering education topics on issues such as construction, health and safety, urban design, and environmental engineering in the context of the MENA region are covered in further detail. The book concludes with practical recommendations for implementations in engineering education. This is an ideal book for engineering education academics, engineering curriculum developers and accreditation specialists, and deans and leaders in engineering education.

Hispanic Engineer & Information Technology is a publication devoted to science and technology and to promoting opportunities in those fields for Hispanic Americans.

From teaching English to analyzing intelligence for the federal government, the international field offers a broad spectrum of exciting job opportunities. For over twenty years, International Jobs has been the authoritative guide for researching and launching an international career. In this newly revised sixth edition, veteran career counselor Nina Segal updates Eric Kocher's classic reference, providing all the tools necessary for understanding the complex international job market and finding the right employment options. With the tried and true components of previous editions-practical résumé and interviewing advice, market analysis, and insightful "day-in-the-life" stories-as well as substantially increased Web resources, International Jobs is the essential comprehensive reference for students and established professionals alike who want a career in the global marketplace.

GENRE: Adult Contemporary Erotic Romance Author Note: This short story is for your reading pleasure. The characters in this "Billionaire Romance Series" are made-ups. Book One - Arabian Seduction Josie is a disorganized, clumsy, intelligent, hardworking college intern who loves engineering. On a trip to the Middle Eastern paradise of El-Safar with several classmates and her best friend, Fiona, Josie is ready to get out in the field and out of the orientation process. And now, she's been given a desk job that's keeping her from the gritty work she loves. But the man who is keeping her from her passion is also determined to impassion her in other ways-both good and bad. Sheikh Jamal, the handsome billionaire and owner of the business that Josie is interning for, may find Josie to be unkempt and shameless, but he's inexplicably drawn to her, even giving her a personal assignment to keep her nearby. Witness a competition of strong-willed minds as pressure builds from both sides to make Josie a suitable match for the Arabian billionaire. Book Two - Arabian Kiss In the steamy Middle East, engineering intern Josie and handsome oil-tycoon Sheikh Jamal Zahid have just had their first intimate encounter-a passionate embrace, which neither allowed to follow through. She finds him brash, sexist, and yet still the most coolly collected and confident man she's ever come across. Josie's the only person willing to challenge him, the only person who sees him for his rude conduct, and the only person who can get under his skin-even though his stoic face never betrays him. Because of all of this, he insists that she needs to be tamed but cannot control his wandering eyes and hidden lusts around her. Meanwhile, the sheikh's family and Josie's friends play matchmakers and troublemakers, vicariously living through the two of them and watching their sarcastic fights unfold. Between encounters with ex-lover supermodels, awkward business meetings with the sheikh's family as he corrects her etiquette, and fiery trips into the field where Josie feels simultaneously most at home and most vulnerable to the sheikh, this romance leading up to an Arabian kiss will challenge these two strong-willed characters in ways they could have never imagined. Book Three - Arabian Touch Josie's heated relationship with handsome oil-tycoon Sheikh Jamal Zahid reaches new heights of lust and conflict as the two have finally shared their first kiss. Everything they think they feel about one another is getting put to the test now. Josie is questioning her sanity because she never goes for guys like the sheikh-conceited men who think they can tame her. The sheikh, meanwhile, is questioning his sanity because he could have any woman he wants, yet he wants her-a sarcastic, tough woman who isn't throwing herself at his feet. As passions build, an ex-lover closes in, and Josie feels the steam of Jamal's Arabian touch and exchanges it with her own wild tenacity. The two lovers are coming quickly to a crossroad-the end of Josie's internship at the sheikh's company-and they will face the biggest decision of their lives: to continue their strong-willed ways or to open their stubborn hearts for the sake of love. Please note: This is a series of erotic romance stories and not appropriate for young adult readers. The book contains graphic sex, language and situations not appropriate for young adult readers.

This revised twelfth edition of the comprehensive guide to all kinds of work abroad provides essential information on permanent career opportunities around the world for people of all walks of life, from school leavers still deciding on a career to fully qualified professionals. The types of employment covered in The Directory of Jobs & Careers Abroad include: · Agriculture, Fisheries and The Environment. · Banking and Accountancy. · Information Technology and Journalism. · The Law, Medicine and Nursing. · Oil & Gas and Mining & Engineering. · Secretarial, Translating and Interpreting. · Transport & Tourism and Hospitality & Catering. · Voluntary Work. · Work with International Organisations including the United Nations. The book lists the professions and trades in demand overseas and gives all the facts on over thirty five different specific careers with detailed information on recruitment and sources of jobs including consultants, agencies, advertising, the internet etc. and finding work by making use of contacts such as professional associations. In addition there are individual chapters presenting career opportunities in fifty countries which include for each country coverage of employment prospects there plus: · Immigration and residency regulations. · The cost and standard of living. · The language, health, welfare and education, etc. Also included in these chapters are details of employers and agencies specialising in placements in that country and listings of hundreds of overseas subsidiaries of international companies. Other features of The Directory of Jobs & Abroad include a comprehensive index of employers and agencies and, in addition to coverage of how to find work by conventional means, advice on how to find the jobs that aren't advertised by using the Creative Job Search.
