Culling common household items to create an uncommon arsenal of miniature gadgets and sidearms, this guidebook provides do-it-yourself spy enthusiasts with 35 different surveillance tools and weapons. From a mini-catapult in a breath-mint tin to milk-jug cap blow-dart wristwatches, this handbook details how to achieve clandestine ends practically and inexpensively. In addition to creating weapons such as periscopes, bionic ears, and grappling hooks, spies-to-be will find ideas on how to hide their stash--a deck of cards, a false-bottom soda bottle, or a cereal box-brief case--and tips for target practice. Clear diagrams and instructions make construction simple, while easy-to-follow safety tips help ensure DIY builders avoid injuries. Projects include a paper throwing star, a bowler hat launcher, and a Q-pick blow gun.

In a world where moats and drawbridges are in short supply, many people are poorly equipped to defend their turf. However, author and toy designer John Austin can show even the novice knight how to turn pencils, rubber bands, and binder clips into powerful, miniaturized catapults and more. A pair of chopsticks, a few cotton swabs, tape, and string make a handy launcher. A pair of old CDs, craft sticks, and discarded batteries can be fashioned into a working trebuchet. And a bottle cap and rubber band can be transformed into a tiny, toothpick-launching crossbow. This handy resource provides detailed, step-by-step instructions with diagrams to show desktop warriors how to build 35 different siege weapons. All of the projects in MiniWeapons of Mass Destruction 3 are built from common household and office items—plastic rulers, disposable utensils, markers, clothes pins, paper clips, wire hangers, and discarded packaging—all clearly detailed on materials lists. Builders are given a variety of catapults, crossbows, trebuchets, ballistae, and onagers to choose from. Once they've assembled their arsenals, the author provides readers a number of medieval targets to practice their shooting skills. An empty milk carton becomes a siege tower; an oatmeal box, a castle turret. Armed and trained, there's no need for a person's cubicle, desk, or personal space to go undefended. Huzzah! John Austin is a professional toy designer and author of MiniWeapons of Mass Destruction, So Now You're a Zombie, and MiniWeapons of Mass Destruction 2. He lives in Cincinnati, Ohio.

'Cubicle farms are full of enemy combatants begging to be taken out.' WIRED Achieve clandestine ends practically and inexpensively with Desk Wars - perfect for do-it-yourself spy enthusiasts. Follow fully illustrated step-by-step instructions to build 30 miniature secret weapons and surveillance tools from stationery, transforming common household items into uncommon gadgets and sidearms. Assert dominion over the desktop with these cunning contraptions:

Do you know how to make something that can tell whether the \$20 bill in your wallet is a fake? Or how to generate battery power with simple household items? Or how to create your own home security system? Science-savvy author Cy Tymony does. And now you can learn how to create these things and more than 40 other handy gadgets and gizmos in Sneaky Uses for Everyday Things. More than a simple do-it-yourself guide, this quirky collection is a valuable resource for transforming ordinary objects into the extraordinary. With over 80 solutions and bonus applications at your disposal, you will be ready for almost any situation. Included are survival, security, self-defense, and silly applications that are just plain fun. You'll be seen as a superhero as you amaze your friends by: * Transforming a simple FM radio into a device that enables you to eavesdrop on tower-to-air conversations. * Creating your own personalized electronic greeting cards. * Making a compact fire extinguisher from items typically found in a kitchen pantry. * Thwarting intruders with a single rubber band. By using run-of-the-mill household items and the easy-to-follow instructions and diagrams within, you'll be able to complete most projects in just a few minutes. Whether you use Sneaky Uses for Everyday Things as a practical tool to build useful devices, a fun little fantasy escape, or as a trivia guide to impress friends and family, this book is sure to be a reference favorite for years to come.

From the Coke and Mentos fountain makers who found initial fame via Maker Faire and YouTube (more than 150 million views!) comes this collection of DIY science projects guaranteed to inspire a love of experimentation. Fritz Grobe and Stephen Voltz, also known as EepyBird, share their favorite projects: a giant air vortex cannon, a leaf blower hovercraft, a paper airplane that will fly forever, and many more. Each experiment features instructions that will take users from amateur to showman level—there's something here for all skill levels—alongside illustrations, photographs, and carefully explained science. How to Build a Hovercraft is guaranteed to engage curious minds and create brag-worthy results!

The man known as Cheradenine Zakalwe was one of Special Circumstances' foremost agents, changing the destiny of planets to suit the Culture through intrigue, dirty tricks and military action. The woman known as Diziet Sma had plucked him from obscurity and pushed him towards his present eminence, but despite all their dealings she did not know him as well as she thought. The drone known as Skaffen-Amtiskaw knew both of these people. It had once saved the woman's life by massacring her attackers in a particularly bloody manner. It believed the man to be a lost cause. But not even its machine could see the horrors in his past. Ferociously intelligent, both witty and horrific, USE OF WEAPONS is a masterpiece of science fiction.

"A comprehensive look at WMD's antecedents, from flamethrowers of the Peloponnesian War to plague-bearing booby traps.... Rich and entertaining." -Newsweek Featuring a new introduction by the author. Flamethrowers, poison gases, incendiary bombs, the large-scale spreading of disease... are these terrifying agents and implements of warfare modern inventions? Not by a long shot. Weapons of biological and chemical warfare have been in use for thousands of years, and Greek Fire, Poison Arrows & Scorpion Bombs, Adrienne Mayor's fascinating exploration of the origins of biological and unethical warfare draws extraordinary connections between the mythical worlds of Hercules and the Trojan War, the accounts of Herodotus and Thucydides, and modern methods of war and terrorism. Greek Fire, Poison Arrows & Scorpion Bombs will catapult readers into the dark and fascinating realm of ancient war and mythic treachery-and their devastating consequences.
