Introduction to Emergency Management, Fifth Edition, offers a fully up-to-date analysis of US emergency management principles. In addition to expanding coverage of risk management in a time of climate change and terrorism, Hadow, Bullock, and Coppola discuss the impact of new emergency management technologies, social media, and an increasing focus on recovery. They examine the effects of the 2012 election results and discuss FEMA's controversial National Flood Insurance Program (NFIP). Introduction to Emergency Management, Fifth Edition, gives instructors and students the best textbook content, instructor-support materials, and online resources to prepare future EM professionals for this demanding career. Introduction to FEMA's Whole Community disaster preparedness initiative Material on recent disaster events, including the Boston Marathon Bombing (2013), Hurricane Sandy (2012), the Joplin Tornado (2011), the Haiti Earthquake (2011), and the Great East Japan Earthquake (2010) New and updated material on the Department of Homeland Security and the ongoing efforts of the emergency management community to manage terrorism hazards Top-of-the-line ancillaries that can be uploaded to Blackboard and other course management systems.

Meant to aid State & local emergency managers in their efforts to develop & maintain a viable all-hazard emergency operations plan. This guide clarifies the preparedness, response, & short-term recovery planning elements that warrant inclusion in emergency operations plans. It offers the best judgment & recommendations on how to deal with the entire planning process -- from forming a planning team to writing the plan. Specific topics of discussion include: preliminary considerations, the planning process, emergency operations plan format, basic plan content, functional annex content, hazard-unique planning, & linking Federal & State operations.

Course Overview This course is designed to foster an overall culture of risk management throughout the DHS workforce. While providing awareness of the fundamental concepts of risk management, the course will prepare employees to manage risk at home, in the workplace, and the community and provide them with a foundation for further development in the area of risk management. Course Objectives: Upon completion of this course, you should be able to: -Recognize the value of risk management. -Explain how the fundamental concepts and principles of risk management apply at home, in the workplace, and in the community. -Explain how the DHS Risk Management Cycle utilizes logical reasoning and critical thinking to address risk management problems. -Describe how risk management alternatives are developed and evaluated in order to support better decisions to effectively manage risk. -Explain how and why the management of risk is one of the fundamental strategies adopted by DHS in meeting mission performance expectations. -Describe the characteristics of effective risk communication.

In 1789, King Chongjo, ruler of the Yi dynasty, ordered General Yi Duk-moo to compile an official textbook on all martial art forms then present in Korea to preserve them for future generations. The result, the Muye Dobo Tongji, is the only surviving classical text on the Korean arts of war. Based on the earliest known Korean martial arts treatise, the Muye Chebo written in 1599, the Muye Dobo Tongji clearly shows the influence of the neighbouring Japanese and Chinese armies. Through hundreds of wars and invasions, Korean soldiers adapted battlefield skills and tactics from their enemies, creating a unique system of their own. Organised into 24 distinct disciplines comprised of empty hand fighting, weaponry and horsemanship, this book is an accurate historical snapshot of the warrior arts of the hermit kingdom in the late 18th century. The release of 'The Comprehensive Illustrated Manual of Martial Arts of Ancient Korea' marks the first time this volume is available in English. Carefully translated from the original text and illustrated with reproductions of ancient woodblock carvings, this book provides fascinating insights into Korea's martial arts legacy.

"This course is for emergency managers and related professionals working with all types of volunteers and coordinating with voluntary agencies. [It] provides procedures and tools for building and working with voluntary organizations."--Page 4 of cover.

PRECISION MACHINING TECHNOLOGY has been carefully written to align with the National Institute of Metalworking Skills (NIMS) Machining Level I Standard and to support achievement of NIMS credentials. This new text carries NIMS exclusive endorsement and recommendation for use in NIMS-accredited Machining Level I Programs. It's the ideal way to introduce students to the excitement of today's machine tool industry and provide a solid understanding of fundamental and intermediate machining skills needed for successful 21st Century careers. With an emphasis on safety throughout, PRECISION MACHINING TECHNOLOGY offers a fresh view of the role of modern machining in today's economic environment. The text covers such topics as the basics of hand tools, job planning, benchwork, layout operations, drill press, milling and grinding processes, and CNC. The companion Workbook/Shop Manual contains helpful review material to ensure that readers have mastered key concepts and provides guided practice operations and projects on a wide range of machine tools that will enhance their NIMS credentialing success. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Course Overview The goal of this course is to explore how GIS technology can support the emergency management community. Topics addressed in this course include: -GIS fundamentals and history. -How GIS is used in emergency management. -Tools available to enhance GIS usefulness. Course Objectives: At the completion of this course, participants should be able to: -Describe the types of products that GIS can produce. -Explain the role that GIS plays in supporting emergency management through each mission area. -Understand the types of technology options that are currently available, and equip you with a list of questions and issues that you should consider when choosing the best solution for your organization. Primary Audience This course is designed for individuals who supervise emergency management mitigation, planning, response, and recovery operations.

Course Overview This course introduces those with critical infrastructure duties and responsibilities at the State, local, tribal, and territorial levels to the information they need and the resources available to them in the execution of the mission to secure and improve resilience in the Nation's critical infrastructure. Course Objectives: At the end of this course, the participants will be able to: -Summarize critical infrastructure responsibilities. -Identify the range of critical infrastructure government and private-sector partners at the State, local, tribal, territorial, regional, and Federal levels. -Describe processes for effective information sharing with critical infrastructure partners. -Identify various methods for assessing and validating information. Primary Audience This course is designed for all individuals with critical infrastructure protection responsibilities. Prerequisites None. The following are recommended prior to starting the course: -Review of the National Infrastructure Protection Plan (NIPP) and Critical Infrastructure Support Annex to the National Response Framework (NRF) documents. OR-Completion of the following Independent Study courses: -IS-860 a, National Infrastructure Protection Plan and -IS-821, Critical Infrastructure Support Annex.

"The objective of this report is to identify and establish a roadmap on how to do that, and lay the groundwork for transforming how this Nation- from every level of government to the private sector to individual citizens and communities - pursues a real and lasting vision of preparedness. To get there will require significant change to the status quo, to include adjustments to policy, structure, and mindset"--P. 2.

Instructor Guide for the FEMA course to become a CERT team member. It contains the same information as the pdf which can be downloaded from FEMA.gov at no cost. This book contains additional helpful tabs and pages for notes.
