An internationally recognized scholar and critic provides insight into the nature of dramatic expression as he explores the common and distinguishing features of a wide range of dramatic media

"American civil-military relations offers the first comprehensive assessment of the subject since the publication of Samuel P. Huntington's field-defining book, The soldier and the state. Using this seminal work as a point of departure, experts in the fields of political science, history, and sociology ask what has been learned and what more needs to be investigated in the relationship between civilian and military sectors in the 21st century ... What is clear from the essays in this volume is that the line between civil and military expertise and responsibility is not that sharply drawn, and perhaps given the increasing complexity of international security issues, it should not be. When forming national security policy, the editors conclude, civilian and military leaders need to maintain a respectful and engaged dialogue"--Publisher's website.

The cognitive abilities of birds are remarkable: hummingbirds integrate spatial and temporal information about food sources, day-old chicks have a sense of numbers, parrots can make and use tools, and ravens have sophisticated insights in social relationships. This volume describes the full range of avian cognitive abilities, the mechanisms behind such abilities and how they relate to the ecology of the species. Synthesising the latest research in avian cognition, a range of experts in the field provide first-hand insights into experimental procedures, outcomes and theoretical advances, including a discussion of how the findings in birds relate to the cognitive abilities of other species, including humans. The authors cover a range of topics such as spatial cognition, social learning, tool use, perceptual categorization and concept learning, providing the broader context for students and researchers interested in the current state of avian cognition research, its key questions and appropriate experimental approaches.

Everybody has the dream: Build a boat in the backyard and sail off to join the happy campers off Pogo Pogo, right? But how? Assuming you aren't independently wealthy, if you want a boat that's really you, you gotta build it yourself. Backyard boatbuilding has its problems. Building in fiberglass is itchy, smelly, and yields a product that yachting maven L. Francis Herreshoff once called "frozen snot." Ferrocement, once all the rage, has pretty much sunk from favor, if you catch the drift. But there's still wood, right? Ah, wood. Nature's perfect material. You can build in the time-honored traditions of the Golden Age of Yachting, loving crafting intricate joints in rare tropical hardwoods, steaming swamp oak butts to sinuous shapes, holding the whole thing together with nonferrous fastenings that cost a buck or better each. Does that sound like boatbuilding for everyone? What about the currently fashionable wood/epoxy boatbuilding? You butter regular old wood with Miracle Whip, stick it together in the shape of a boat, and off you go, right? Epoxy works, but They don't exactly give it away; nor is it exactly a benign substance. Suiting up like Homer Simpson heading for a fun-filled day at the nuclear power plant isn't exactly the aesthetic boatbuilding experience many of us are looking for. Where does that leave us? In the capable hands of George Buehler, who honors the timeless traditions of the sea all right, but those from the other side of the boatyard tracks. Buehler draws his inspiration from centuries of workboat construction, where semiskilled fishermen built rugged, economical boats from everyday materials in their own backyards, and went to sea in them in all kinds of weather, not just when it was pleasant. Buehler's boats sail on every ocean and perform every task, from long-term liveaboards in Norwegian fjords to a traveling doctor's office in Alaska. This book contains complete plans for seven cruising boats--from a 28-foot sailboat to a 55-foot power cruiser. All the information you need is here, including step-by-step instructions honed by nearly 20 years of supplying boat plans to backyard builders--and helping them out when they get into trouble. Buehler is anarchic, heretical, and occasionally profane; his book is West Coast counterculture meets traditional hardchine workboat construction, leavened with hardnosed common sense and penny-pinching economy. This book is for those who look around them and see that much of what is done in the world today--whether in yachting or politics or economics or interpersonal relationships--is based not on logic but on conforming and meeting other people's expectations. This book is most definitely NOT about either. It is about the realization of dreams. If you believe that everyone who wants a cruising boat can have one. . . . If you see beauty beneath the fish scales and work scars of a commercial fishing boat . . . If you want to build a simple, rugged, economical, good-looking cruising boat--power or sail--using everyday lumberyard materials and few skills other than perseverance, this is the book for you. Buehler's Backyard Boatbuilding tells you how to build extraordinary boats using the most ordinary skills and materials, with complete plans, instructions, and specifications for seven real cruising boats ranging from a 28-foot sailboat to a 55-foot power cruiser. "Build wooden boats the Buehler way, which is to say inexpensively, yet like the proverbial brick outhouse."--WoodenBoat Richly flavored with personal advice and anecdotes as well as a wealth of valuable information."--American Sailing Association "Everyone will revere this book."--The Ensign

Musicians tend to believe that the mystery of their art cannot be objectively studied, quantified, or explained. As a result, the term «motor learning» is rarely used in connection with musicians, and an empirical approach to musical performance is more the exception than the rule. Sports scientists, however, show a great interest in musicians because of their advanced skill level and the attentional and emotional demands of the concert stage. This work combines knowledge across disciplines. Advances toward an understanding of human behavior and cognition offer clues to strategies of motor learning and performance that promote the well-being of musicians and athletes. This book provides a forum for an interdisciplinary exchange of research, laying the groundwork for future projects.

Designed for introductory students, this text provides the reader with a solid research base and defines difficult material by identifying concepts and demonstrating applications for each of those concepts. Motor Learning and Control: Concepts and Applications also includes references for all relevant material to encourage students to examine the research for themselves.

The second adventure in Eva Hudson's enormously popular Ingrid Skyberg series. Special Agent Ingrid Skyberg was the last person to see her best friend alive when they were fourteen. The haunting memories of that night shaped Ingrid's life, driving her to become one of the toughest agents ever to join the FBI. Supremely fit, doggedly tenacious and virtually indestructible,

Ingrid now works out of the US embassy in London. Madison Faber, a brilliant psychology student at a prestigious London college, has discovered her friend's body in a pool of blood. Now she's in police custody being questioned for murder. Protesting her innocence, Faber fears the killer will target her next and persuades Ingrid to hunt him down. But the deeper Ingrid digs, the deadlier the case gets. And when she uncovers a sinister group operating within the psychology department, Ingrid is in far more danger than she realizes. Up against the clock, and disobeying strict FBI protocols, Ingrid's obsession to bring the killer to justice takes her far beyond the law. So far she may never get back. Unlock the thrills and twists of this up-all-night crime thriller series, perfect for fans of gripping mysteries, strong female detectives and any reader who has ever wondered if there's a female version of Jack Reacher. There is, and her name is Ingrid Skyberg. PRAISE FOR EVA HUDSON "I was immediately struck by the plotting savvy and grip-factor of Eva Hudson's writing – she is a natural storyteller" - Sophie Hannah "In the tradition of all good thrillers, the plot rattles along at a fine pace. An intriguing mystery with many unexpected twists – not least of all the ending" - James Oswald "Gripped me from the first page. Ingrid Skyberg is a brilliant character" - DS Butler
