The 2-stroke Vespa is a style icon – an undoubted classic, and an immediately recognized symbol of its native Italy. Demand for these stylish scooters is booming, and interest in restoring and renovating them is at an all-time high. With its clear and concise text aided by extensively captioned full color photographs, this practical book guides the DIY enthusiast through all the stages of restoring a classic 2-stroke Vespa, taking it from a rusty unroadworthy wreck back to its factory fresh, former glory. It shows how to assess wear in all mechanical components, then assists in deciding the best and most cost effective method to renovate or repair. Both large and small frame power units are covered in detail, giving the reader confidence to carry out their own repairs to a high standard, which is both satisfying and cost effective. Brakes, suspension, electrical systems and brightwork are all addressed, from changing a bulb to welding in a new floor pan. An essential reference for all Vespa enthusiasts.

The Haynes Service and Repair manual for the Piaggio Vespa Scooter.

With fuel costs and parking charges it's no wonder the consumer is looking for less expensive forms of travel. This book is aimed at the rider who wants to do his or her own basic scooter maintenance and servicing without the need for in-depth mechanical knowledge, or a technical manual. It covers areas such as oil, brakes, tyres, transmission, electrics, etc, allowing the owner to address the most regularly serviced items without forking out for additional costs. Illustrated with full colour photographs throughout, and featuring clear, easy-to-follow instructions, this book is a must-have for scooter users.

"Complete coverage for your Twist and Go Scooter covering 50 to 250cc engines. Your guide to servicing and routine maintenance, engine, transmission, fuel and ignition system repairs, braking, suspension, steering and bodywork repairs. Haynes Hints and Tool Tips give you inside information while its Wrench/Spanner ratings grade all tasks by experience level ."--Publisher description.

Since the education of aeronautical engineers at Delft University of Technology started in 1940 under the inspiring leadership of Professor H.J. van der Maas, much emphasis has been placed on the design of aircraft as part of the student's curriculum. Not only is aircraft design an optional subject for thesis work, but every aeronautical student has to carry out a preliminary airplane design in the course of his study. The main purpose of this preliminary design work is to enable the student to synthesize the knowledge obtained separately in courses on aerodynamics, aircraft performances, stability and control, aircraft structures, etc. The student's exercises in preliminary design have been directed through the years by a number of staff members of the Department of Aerospace Engineering in Delft. The author of this book, Mr. E. Torenbeek, has made a large contribution to this part of the study programme for many years. Not only has he acquired vast experience in teaching airplane design at university level, but he has also been deeply involved in design-oriented research, e.g. developing rational design methods and systematizing design information. I am very pleased that this wealth of experience, methods and data is now presented in this book.

Haynes has discovered all the problems that motorcycle owners could possibly encounter when rebuilding or repairing their bikes. Documenting the most common DIY fixes with hundreds of illustrations and step-by-step instructions, this compendium of repair, modification and troubleshooting advice is applicable to all domestic and import marques.

The book presents high quality research papers presented by experts in the International Conference on Internet Computing and Information Communications 2012, organized by ICICIC Global organizing committee (on behalf of The CARD Atlanta, Georgia, CREATE Conferences Inc). The objective of this book is to present the latest work done in the field of Internet computing by researchers and industrial professionals across the globe. A step to reduce the research divide between developed and under developed countries.
