This is about the economics of being poor. And refreshingly instead of focusing on the theories of poverty and the decision making of the poor, it is based on large scale, many country research asking those on less than a \$1 a day how they make decisions on how they spend their money, what food to eat, what health care to seek, what education to try to get their children.

As such, there is nothing directly confrontational about Poor Economics. They are peeling the onion, not hacking it to pieces." The Guardian, May 18, 2011 "Abhijit Banerjee and Esther Duflo's book, Poor Economics: A Radical Rethinking of the Way to Fight Global Poverty, is making waves in development circles. Beyond the strong focus on randomised control trials, the book distinguishes itself by wading into issues on which the development community has often ignored or made uninformed guesses.

Are these ideas really new ideas? Development practitioners could argue that economists are discovering now what they have known themselves for some years. In this respect, the subtitle of the book – A Radical Rethinking of the Way to Fight Global Poverty – sounds a bit presumptuous. Moreover, it does not really do justice to the very humble and meticulous approach of its authors, which is clearly a big plus of this essay.

The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In Poor Economics, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called "marvelous, rewarding" by the Wall Street Journal, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. WINNERS OF THE 2019 NOBEL PRIZE IN ECONOMICS Imagine you have a few million dollars. You want to spend it on the poor. How do you go about it? Billions of government dollars, and thousands of charitable organizations and NGOs, are dedicated to helping the world ' s poor. But much of their work is based on assumptions about the poor and the world that are untested generalizations at best, harmful misperceptions at worst. Abhijit V. Banerjee and Esther Duflo have pioneered the use of randomized control trials in development economics through their award-winning Poverty Action Lab. They argue that by using randomized control trials, and more generally, by paying careful attention to the evidence, it is possible to make accurate—and often startling assessments—on what really impacts the poor and what doesn ' t. Why would a man in Morocco who doesn ' t have enough to eat buy a television? Why is it so hard for children in poor areas to learn even when they attend school? Why do the poorest people in Maharashtra spend 5 percent of their total budget on sugar? Does having lots of children actually make you poorer? Drawing on their research at the Poverty Action Lab and their fifteen years of fieldwork in India and across the world, the two economists ask many such questions and show why the poor, despite having the same desires and abilities as anyone else, end up with entirely different lives. Revelatory and impassioned, Poor Economics is a pathbreaking book that will help you to understand the real causes of poverty and how to end it.

Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In Poor Economics, Abhijit V. Banerjee and Esther Duflo, two practical visionaries working toward ending world poverty, answer these questions from the ground. In a book the Wall Street Journal called " marvelous, rewarding," the authors tell how the stress of living on less than 99 cents per day encourages the poor to make questionable decisions that feed—not fight—poverty. The result is a radical rethinking of the economics of poverty that offers a ringside view of the lives of the world's poorest, and shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

* Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. As you read this summary, you will discover that beyond the traditional anti-poverty policies that have emerged over the past decades, there is another way of looking at situations. You will also discover that : the poor have little access to information; the poor take responsibility for too many aspects of their lives; they have no access to certain markets, such as credit, or at exorbitant prices; poor countries are not doomed to failure because they are poor; when a situation begins to improve, beliefs and certainties change. Abhijit Banerjee and Esther Duflo rely on field studies with NGOs, government officials, health workers, etc., to support their work. They propose a new vision of poverty and, above all, ways of fighting it, through limited experiments and ingenious solutions proven in the field. They present not one, but models, based on the idea that it is by understanding the livelihoods of the poorest that solutions can be found to help them out of poverty. From the award-winning founders of the Abdul Latif Jameel Poverty Action Lab at MIT, a transformative reappraisal of the world of the extreme poor, their lives, desires, and frustrations.

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard Times makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

By the winner of the 1988 Nobel Prize in Economics, an essential and paradigm-altering framework for understanding economic development--for both rich and poor--in the twenty-first century. Freedom, Sen argues, is both the end and most efficient means of sustaining economic life and the key to securing the general welfare of the world's entire population. Releasing the idea of individual freedom from association with any particular historical, intellectual, political, or religious tradition, Sen clearly demonstrates its current applicability and possibilities. In the new global economy, where, despite unprecedented increases in overall opulence, the contemporary world denies elementary freedoms to vast numbers--perhaps even the majority of people--he concludes, it is still possible to practically and optimistically restrain a sense of social accountability. Development as Freedom is essential reading.
