*****This book contains some content appropriate for age 18+ and is not suitable for younger readers***** Growing up without a mother, Camden never learned the rules of sex until introduced to them by a bad boy who took advantage of her innocence—breaking her. Will spiraled into a world of darkness following an unbearable hurt...in turn using women and alcohol to dull the pain. Two wounded people...coming together under awkward circumstances...healing each other...until the bad boy from Camden's past finds her... Does Will have the power to fight for someone worth fighting for? Camden Biggs, the daughter of a professional baseball player...lost her mother at age 9. Eager to be loved, she fell in

love with the hottest, bad boy she'd ever met at age 15, Max. Totally off limits and living under the same roof, she succumbed to his manipulations until he was forced out of her life—hanging on to a promise to only give herself to him. Will Denton raised by a trailer trash father and a trust fund mother had a taste of both worlds and all sorts of women—especially when he dove into a world of darkness following a tragedy and loss of his own. Camden, now a senior at the University of Kansas where she tutors the hottest, most talented athletes hides behind her outgoing roommate Kate—who is sexually active enough for both of them; Camden lives vicariously through Kate while still trying to heal her wounds from the past—until Will Denton comes home with Kate one night. Though he slept with Kate, he sets his sights on Cam. Camden finally succumbs to the gorgeous eyes and body of Will Denton. And as Will is finally starting to tear down the walls that Cam has built over the years...Bad Boy Max makes a reappearance to reclaim what was once his.

Scars are tattoos with better stories... A scarred, lonely woman A curious little boy One uninvited, tattooed guest A nasty blizzard One cabin Two guns A set of handcuffs What could possibly go wrong? Mela McKinley fled with her infant son and disappeared four years ago trying to heal the awful scars inside and out. Taking refuge in the mountains of Colorado, not one person had come near their secluded doorstep... though she was prepared for a fight. In the middle of a historic blizzard, little Beck points out the window to a figure approaching in the snow. After hiding Beck...and fully armed, Mela confronts Jackson Winslow and has zero reservations about shooting him, if necessary. Ultimately, saving him from the forces of nature, she takes the uninvited stranger prisoner in her home holding the upper hand. While cautiously tending to him, she realizes how much she has

missed a man-though this scarred and tattooed man is not who he seems. Once he has invaded her thoughts in a delicious way, her guard is down and suddenly, the tables are turned and now...it's his turn. What she doesn't know is who he really is and what he brings to her doorstep.

Emma Hendricks.....Zach OwensShe's 15.....He's 18She's experienced nothing... He's experienced the world...What happens when their worlds collide? Never allowed to date, will the relationship survive Emma's overly-protective, older brother and his friends? And what happens when his past is revealed and she discovers he's on probation. Even if she accepts it, she must lie to her parents and those around her. She's always been... Just one of the boys... and now a man sees her as so much more... Can she convince him that she is old enough to love?Old Enough to Love is the story of Emma Hendricks, or Runt as she's known to her older brother and his friends. Emma-born prematurely has always been physically smaller than other girls. Protected by a posse of guys, led by her brother, she's pretty much off limits as dating material for anyone in their small high school-until Zach Owens, a senior from San Francisco moves to the small town of Ashland, Oregon and is oblivious to the unspoken rule. Emma, an inexperienced fifteen-year-old, is smitten with Zach and the undeniable attraction brewing between them. She attempts to compete with the older girls to maintain Zach's affections and believes she is ready to take the relationship to the next level. Though she is eager to easily bid her virginity farewell; she misunderstands his hesitations. Zach is on twelve months supervised probation and caught a lucky break the first time around. He adamantly refuses to participate in any activity that would lead to juvenile detention, and he is frightened he'll lose Emma if specific information about his past is revealed. Zach and Emma uncover blooming

passionate emotions while discovering first time love, all the while reining in nearly uncontrollable desires. Meanwhile, their biggest obstacles are the battle with her brother, her brother's buddies and Zach's elusive past.

Nothing in life has ever come easy for the boy from the other side of the tracks. A mother that left. A father that hit. A brother that protected. They say everything happens for a reason. Joss Hess has spent his entire life looking for that reason. After nearly killing a man and barely avoiding prison, Joss finds himself sentenced to 18 months on Briscoe Ranch, where certain things are expected. Hard work. Manners. Responsibility. Respect. Worst of all-anger management and restraint. If he fails, Joss will be sent back to the state penitentiary to serve the remainder of his sentence. One road block stands between Joss and his freedom: Ren Briscoe. Raised by ranchers, Ren Briscoe has been around men her entire life. Home on summer vacation, she quickly realizes that Joss Hess is unlike any man she has ever encountered before. She hates everything about him...his filthy mouth, arrogant attitude, the way he makes fun of her purity ring and her boyfriend. Mostly, she hates him because no matter how hard she fights it. Joss occupies her every thought. He may be the convict serving his sentence; but the real prisoner is Ren.

I'm Kieran Scott...I don't disagree that therapy would be beneficial for a guy like me. However, when I saw the beautiful, gray-eyed therapist I was supposed to spill my thoughts too in my first session...well, let's just say her mouth should be used for one thing...and it wasn't talkin'. Ms. Keep it Professional thought she had control of these

sessions. She didn't know who she was dealing with. I would turn the tables faster than she could spell F-*-C-K-M-E!

Professional Code of Ethics: Canon 3E/Rule 2.11(A)

-Disqualification may be required if a judge's impartiality might reasonably be questioned if -Presiding over cases involving an attorney with whom the judge had a romantic relationship. There are no accidents. People cross paths for a reason. I'm not sure why ours crossed but within a second, I realized, she could destroy everything. There's a code of ethics in some professions where certain relationships are frowned upon. She's the prosecutor. I'm the judge. Sleeping with her is all sorts of hell no! Ethic review boards could remove me from the bench-as in "You're fired." Even worse, my father would kill me if his name were tainted. But it would kill me more not to have her. They say rules are meant to be broken. But is she worth the risk? The only thing I was sure of-I wanted to completely overrule her perfect little world.

An account of the Flint water crisis shows that Flint's struggle for safe and affordable water is part of a broader struggle for democracy. When Flint, Michigan, changed its source of municipal water from Lake Huron to the Flint River, Flint residents were repeatedly assured that the water was of the highest quality. At the switchover ceremony, the mayor and other officials performed a celebratory toast, declaring "Here's to Flint!" and downing glasses of freshly treated water. But as we now know, the water coming out of residents' taps harbored a variety of contaminants, including high levels of lead. In *Flint Fights Back*, Benjamin Pauli examines the water crisis and the political activism that it inspired, arguing that Flint's struggle for safe and affordable water was part of a broader struggle for democracy. Pauli connects Flint's water activism with the ongoing movement

protesting the state of Michigan's policy of replacing elected officials in financially troubled cities like Flint and Detroit with appointed "emergency managers." Pauli distinguishes the political narrative of the water crisis from the historical and technical narratives, showing that Flint activists' emphasis on democracy helped them to overcome some of the limitations of standard environmental justice frameworks. He discusses the pro-democracy (anti-emergency manager) movement and traces the rise of the "water warriors"; describes the uncompromising activist culture that developed out of the experience of being dismissed and disparaged by officials; and examines the interplay of activism and scientific expertise. Finally, he explores efforts by activists to expand the struggle for water justice and to organize newly mobilized residents into a movement for a radically democratic Flint.

Detection Theory is an introduction to one of the most important tools for analysis of data where choices must be made and performance is not perfect. Originally developed for evaluation of electronic detection, detection theory was adopted by psychologists as a way to understand sensory decision making, then embraced by students of human memory. It has since been utilized in areas as diverse as animal behavior and X-ray diagnosis. This book covers the basic principles of detection theory, with separate initial chapters on measuring detection and evaluating decision criteria. Some other features include: *complete tools for application, including flowcharts, tables, pointers, and software; *student-friendly language; *complete coverage of content area, including both one-dimensional and multidimensional models; *separate, systematic coverage of sensitivity and response bias measurement; *integrated treatment of threshold and nonparametric approaches; *an organized, tutorial level introduction to multidimensional

detection theory; *popular discrimination paradigms presented as applications of multidimensional detection theory; and *a new chapter on ideal observers and an updated chapter on adaptive threshold measurement. This up-to-date summary of signal detection theory is both a self-contained reference work for users and a readable text for graduate students and other researchers learning the material either in courses or on their own.

A morbidly fascinating and articulate collection of essays, this book explores the grim underside of America's cult of the automobile and the disturbing, frequently conspiratorial, speculations that arise whenever the car becomes the cause or the site of human death. Through analysis of fatal celebrity car accidents and other examples of death by automobile, as well as through personal memoir and forensic reports, cultural critics ponder our very human fascination with the car crash. Topics include the roles and experiences of passengers and bystanders, car crash conspiracy theories, the automobile as a site of murder, studies of car crash cinema, and psychological interpretations of the notion of the 'accident.' The book features original essays by such underground icons as Kenneth Anger and Adam Parfrey.

This volume includes the full proceedings from the 2016 Academy of Marketing Science (AMS) Annual Conference held in Orlando, Florida, entitled Creating Marketing Magic and Innovative Future Marketing Trends. The marketing environment continues to be dynamic. As a result, researchers need to adapt to the ever-changing scene. Several macro-level factors continue to play influential roles in changing consumer lifestyles and business practices. Key factors among these include the increasing use of technology and automation, while juxtaposed by nostalgia and “back to

the roots” marketing trends. At the same time, though, as marketing scholars, we are able to access emerging technology with greater ease, to undertake more rigorous research practices. The papers presented in this volume aim to address these issues by providing the most current research from various areas of marketing research, such as consumer behavior, marketing strategy, marketing theory, services marketing, advertising, branding, and many more. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses, and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complementing the Academy’s flagship journals, the *Journal of the Academy of Marketing Science* (JAMS) and *AMS Review*. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science.
