his experiences as a detective, including accounts of arrests, death penalty executions, and criminal encounters Police Procedure & Investigation is the next best thing to having a police detective personally assigned to your book!

Every day, billions of photographs, news stories, songs, X-rays, TV shows, phone calls, and emails are being scattered around the world as sequences of zeroes and ones: bits. We can't escape this explosion of digital information and few of us want to—the benefits are too seductive. The technology has enabled unprecedented innovation, collaboration, entertainment, and democratic participation. But the same engineering marvels are shattering centuries-old assumptions about privacy, identity, free expression, and personal control as more and more details of our lives are captured as digital data. Can you control who sees all that personal information about you? Can email be truly confidential, when nothing seems to be private? Shouldn't the Internet be censored the way radio and TV are? is it really a federal crime to download music? When you use Google or Yahoo! to search for something, how do they decide which sites to show you? Do you still have free speech in the digital world? Do you have a voice in shaping government or corporate policies about any of this? Blown to Bits offers provocative answers to these questions and

brightest stars of the silver screen couldn't resist curling up with a good book. This unique collection of rare photographs celebrates the joy of reading in classic film style. The Hollywood Book Club captures screen luminaries on set, in films, in playful promotional photos, or in their own homes and libraries with books from literary classics to thrillers, from biographies to children's books, reading with their kids, and more. Featuring nearly 60 enchanting images, lively captions about the stars and what they're reading by Hollywood photo archivist Steven Rea, here's a real page-turner for booklovers and cinephiles.

Included in this audio-enhanced edition are recordings of the U.S. Poet Laureate Natasha Trethewey reading *Native Guard* in its entirety, as well as an interview with the poet from the HMH podcast *The Poetic Voice*, in which she recounts what it was like to grow up in the South as the daughter of a white father and a black mother and describes other influences that inspired the work. Experience this Pulitzer Prize-winning collection in an engaging new way. Growing up in the Deep South, Natasha Trethewey was never told that in her hometown of Gulfport, Mississippi, black soldiers had played a pivotal role in the Civil War. Off the coast, on Ship Island, stood a fort that had once been a Union prison housing Confederate captives. Protecting the fort was the second

Get Free Rare Book Search Engines

regiment of the Louisiana Native Guards -- one of the Union's first official black units. Trethewey's new book of poems pays homage to the soldiers who served and whose voices have echoed through her own life. The title poem imagines the life of a former slave stationed at the fort, who is charged with writing letters home for the illiterate or invalid POWs and his fellow soldiers. Just as he becomes the guard of Ship Island's memory, so Trethewey recalls her own childhood as the daughter of a black woman and a white man. Her parents' marriage was still illegal in 1966 Mississippi. The racial legacy of the Civil War echoes through elegiac poems that honor her own mother and the forgotten history of her native South. *Native Guard* is haunted by the intersection of national and personal experience.

A revealing look at how negative biases against women of color are embedded in search engine results and algorithms Run a Google search for "black girls"—what will you find? "Big Booty" and other sexually explicit terms are likely to come up as top search terms. But, if you type in "white girls," the results are radically different. The suggested porn sites and un-moderated discussions about "why black women are so sassy" or "why black women are so angry" presents a disturbing portrait of black womanhood in modern society. In *Algorithms of Oppression*, Safiya Umoja Noble challenges the

Get Free Rare Book Search Engines

idea that search engines like Google offer an equal playing field for all forms of ideas, identities, and activities. Data discrimination is a real social problem; Noble argues that the combination of private interests in promoting certain sites, along with the monopoly status of a relatively small number of Internet search engines, leads to a biased set of search algorithms that privilege whiteness and discriminate against people of color, specifically women of color. Through an analysis of textual and media searches as well as extensive research on paid online advertising, Noble exposes a culture of racism and sexism in the way discoverability is created online. As search engines and their related companies grow in importance—operating as a source for email, a major vehicle for primary and secondary school learning, and beyond—understanding and reversing these disquieting trends and discriminatory practices is of utmost importance. An original, surprising and, at times, disturbing account of bias on the internet, *Algorithms of Oppression* contributes to our understanding of how racism is created, maintained, and disseminated in the 21st century.

"This book is intended for scientists and decision-makers who wish to gain working knowledge about search engines in order to evaluate available solutions and to dialogue with software and data providers"--Provided
