~~Edward Said: A Legacy of Emancipation and Representation~~

In these six essays--delivered on the BBC as the prestigious Reith Lectures--Edward Said addresses the ways in which the intellectual can best serve society in the light of a heavily compromised media and of special interest groups who are protected at the cost of larger community concerns. Said suggests a recasting of the intellectual's vision to resist the lures of power, money, and specialization. In these pieces, Said eloquently illustrates his arguments by drawing on such writers as Antonio Gramsci, Jean-Paul Sartre, Regis Debray, Julien Benda, and Theodore Adorno, and by discussing current events and celebrated figures in the world of science and politics: Robert Oppenheimer, Henry Kissinger, Dan Quayle, Vietnam and the gulf War. Said sees the modern intellectual as an editor, journalist, academic, or political adviser--in other words, a highly specialized professional--who has moved from a position of independence to an alliance with powerful corporate, institutional, or governmental organizations. He concludes that it is the exile-immigrant, the expatriate, and the amateur who must uphold the traditional role of the intellectual as the voice of integrity and courage, able to speak out against those in power.

Edward W. Said (1935-2003) ranks as one of the most preeminent public intellectuals of our time. Through his literary criticism, his advocacy for the Palestinian cause, and his groundbreaking book Orientalism, Said elegantly enriched public discourse by unsettling the status quo. This indispensable volume, the most comprehensive and wide-ranging resource on Edward Said's life and work, spans his broad legacy both within and beyond the academy. The book brings together contributions from thirty-one luminaries--leading scholars, critics, writers, and activists--to engage Said's provocative ideas. Their essays and interviews explore the key themes of emancipation and representation through the prisms of postcolonial theory, literature, music, philosophy, and cultural studies. A deeply humanistic work, the book offers a nuanced and meditative examination of many controversial issues that are as fiercely debated today as they were during Said's life--from imperialism, Zionism, and the Palestinian-Israeli impasse to exile, secularity, and role of the intellectual. This book explores popular media depictions of higher education from an American perspective. Each chapter in this book investigates the portrait of higher education in an exciting array of media including novels, television, film, comic books, and video games revealing the ways anti-intellectualism manifests through time. Examining a wide range of narratives, the authors in this book provide incisive commentary on the role of the university as well as the life of students, faculty, and staff in fictional college campuses.

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.

One of our best-known cultural critics examines the concept of representation and its many and varied forms in literature and art.

Ever since the appearance of his groundbreaking The Question of Palestine, Edward Said has been America's most outspoken advocate for Palestinian self-determination. As these collected essays amply prove, he is also our most intelligent and bracingly heretical writer on affairs involving not only Palestinians but also the Arab and Muslim worlds and their tortuous relations with the West. In The Politics of Dispossession Said traces his people's struggle for statehood through twenty-five years of exile, from the PLO's bloody 1970 exile from Jordan through the debacle of the Gulf War and the ambiguous 1994 peace accord with Israel. As frank as he is about his personal involvement in that struggle, Said is equally unsparing in his demolition of Arab icons and American shibboleths. Stylish, impassioned, and informed by a magisterial knowledge of history and literature, The Politics of Dispossession is a masterly synthesis of scholarship and polemic that has the power to redefine the debate over the Middle East.

This broad-ranging text offers a comprehensive outline of how visual images, language and discourse work as `systems of representation'. Individual chapters explore: representation as a signifying practice in a rich diversity of social contexts and institutional sites; the use of photography in the construction of national identity and culture; other cultures in ethnographic museums; fantasies of the racialized `Other' in popular media, film and image; the construction of masculine identities in discourses of consumer culture and advertising; and the gendering of narratives in television soap operas.

Though the tremendous amount of recently-emerged developmentally-oriented research has produced much progress in understanding the personality, social, and emotional characteristics of persons with intellectual disabilities (ID), there is still much we don't know, and the vast task of precisely charting functioning in all these areas, while also identifying the associated fine-tuned, complex, and intertwined questions that crop up along the way, seems daunting and insurmountable. The goal of The Oxford Handbook of Intellectual Disability and Development is to update the field with new, precise research and sophisticated theory regarding individuals with ID provided by seasoned developmental theorists who have made original conceptual contributions to the field. This volume is divided into five general sections (ID and its connection to genetics, relationships, cognitive development, socio-emotional development, and development of language), with each focused on a domain of functioning or aspect of life that is inherent to an integrated, transactional perspective of development. While developmental approaches to understanding persons with intellectual disability will continue to emerge, this comprehensive volume is a must-read for specialists and developmental psychologists who must have the conceptual foundations for examining the developmental trajectories across persons with any of the many different ID etiologies.

The late Edward Said remains one of the most influential critics and public intellectuals of our time, with lasting contributions to many disciplines. Much of his reputation derives from the phenomenal multidisciplinary influence of his 1978 book Orientalism. Said's seminal polemic analyzes novels, travelogues, and academic texts to argue that a dominant discourse of West over East has warped virtually all past European and American representation of the Near East. But despite the book's wide acclaim, no systematic critical survey of the rhetoric in Said's representation of Orientalism and the resulting impact on intellectual culture has appeared until today. Drawing on the extensive discussion of Said's work in more than 600 bibliographic entries, Daniel Martin Varisco has written an ambitious intellectual history of the debates that Said's work has sparked in several disciplines, highlighting in particular its reception among Arab and European scholars. While pointing out Said's tendency to essentialize and privilege certain texts at the expense of those that do not comfortably fit his theoretical framework, Varisco analyzes the extensive commentary the book has engendered in Oriental studies, literary and cultural studies, feminist scholarship, history, political science, and anthropology. He employs "critical satire" to parody the exaggerated and pedantic aspects of post-colonial discourse, including Said's profound underappreciation of the role of irony and reform in many of the texts he cites. The end result is a companion volume to Orientalism and the

vast research it inspired. Rather than contribute to dueling essentialisms, Varisco provides a path to move beyond the binary of East versus West and the polemics of blame. Reading Orientalism is the most comprehensive survey of Said's writing and thinking to date. It will be of strong interest to scholars of Middle East studies, anthropology, history, cultural studies, post-colonial studies, and literary studies.
