from debates about the scientific status of psychology to the special problems which the study of people poses for psychologists. Each chapter presents important issues in depth, highlighting controversies while showing that they rarely have neat solutions. Throughout, emphasis is given to the contrasting levels of analysis which contribute to the understanding of psychological functioning, from fundamental biological processes to complex social interactions. While prepared for the Open University course "Introduction to Psychology" these volumes will provide an excellent introduction to students of psychology at other universities and colleges. The text incorporates the best of the Open University's tried and tested teaching methods, and particular importance is placed on encouraging the reader's active participation, making the books enjoyable and stimulating as well as informative. The text is divided into eight sections comprising eighteen

There ' s Mr. Stranger, a greedy, arrogant lawyer that is trying to steal his stepson ' s trust fund. There ' s Bart, his stepson, who is forced to hide out in a monastery to avoid being found by the stepfather ' s private detective. Bart has own personal problem, which is trying to say the difficult four-letter word, " love. " There ' s Carol, Bart ' s older sister, who thinks she may have found Mr. Right, but Mr. Right is ready for some loving but not any kind of commitment. There ' s Tony Koole, a gangster, who is hot on the trail of Bart ' s girlfriend, whom he suspects stole his brief case containing cocaine worth two million dollars. There ' s Abbot Aloysius, a kind gentle monk, who doesn ' t have any idea someone may be growing marijuana in the monastery ' s huge forest. Finally after a dozen twists and turns, there is a surprise ending.

This casebook offers fifteen lively cases that illustrate a wide range of specific DSM-IV diagnoses covered in the abnormal psychology course. These cases integrate issues of racial and gender diversity and provide insight into the lives of people

suffering from a variety of psychological disorders, highlighting how psychological distress is experienced and treated in real life. Each case follows a similar pattern to aid reader comprehension. An Introduction describes the problems in the person's life, or the catalyst bringing him or her into therapy. A Psychosocial History offers childhood and other relevant background data to provide a context for the disorder. The Conceptualization section offers the rationale for the diagnosis and the Treatment section then outlines the appropriate psychotherapy as well as any other treatments such as medication or group therapy. The Discussion section highlights interesting aspects of the case, presents relevant research, and examines various theoretical perspectives on treatment. Finally, the Prognosis section covers reasonable expectations of what the future might hold for this person. Critical Thinking Questions are posed at the end of each chapter. Gender and cultural diversity are highlighted among both clients and psychotherapists with important cultural issues woven throughout the cases. The cases themselves feature people from a variety of backgrounds and heritages, the impact of sociocultural factors on the experience or prevalence of a disorder is often discussed, as well as how treatment is affected when the client and therapist come from different ethnic backgrounds. This casebook also features diverse theoretical orientations that drive treatment. Treatment outcomes are diverse and realistic and span from short to long-term. Most are designed as ideal interventions, but some are influenced by economic concerns and changing models of available services. For anyone interested in abnormal psychology.

This textbook provides a comprehensive account of psychology for all those with little or no previous knowledge of the subject. It covers the main areas of psychology, including social psychology, developmental psychology, cognitive psychology, personality, intelligence, and biological psychology.; Each chapter contains definitions of key terms, together with several multiple-choice questions and answers, and semi- structured essay questions. In addition, every chapter contains a "Personal Viewpoint" section, which encourages the reader to compare his or her views on psychology with the relevant findings of psychologists. The last chapter is devoted to study skills, and provides numerous practical hints for readers who want to study more effectively.

The editor's goal in compiling this book was to invite authors to articulate their philosophies, course designs, and teaching techniques for the introductory psychology course. The authors were told to write a chapter for all introductory psychology teachers and to address how the teaching of introductory psychology could be made more rewarding to students and teachers alike. A few authors comment specifically on the writing process of introductory textbooks, and the parallels they have found between the classes they teach and the material they write. It is hoped that these chapters help to shed light on any introductory textbook's underlying purpose, goals, and organization and thus enable teachers to use these essential texts more effectively.
