This first novel in the Noble Warriors sequence begins when sixteen-year-old Seeker's older brother is publicly humiliated and--with no explanation--exiled from the Nomana, a revered order of warrior monks. Seeker refuses to believe that his beloved older brother is capable of committing a betrayal that would warrant such severe consequences, so he sets off alone on a journey to rescue his brother and find out at last what really happened. Along the way he meets two other young people who are on quests of their own, and in a shocking turn of events, the three are soon caught up in a harrowing and bloody race to save the Nomana--and themselves—from destruction. An epic coming-of-age story about courage, friendship, desire, and faith, Seeker marks the beginning of a riveting new series.

Izzy Newton has a problem with her goal shooting in basketball. While recovering from a broken leg, she learns of her namesake, Isaac Newton, and his work on the law of gravity. While searching for information on Isaac Newton on a computer in the library, Izzy finds herself communicating directly with the man himself, across 300 years and through some form of Internet time warp.

Book three in the Wizard Twins series. Astra Al'madere betrayed all. Those she loved. Those she swore to protect. And all for the Dark Wizards whose passion and heat she can't live without. A Sorceress can sense her Twins, the men destined to join her in her power to strengthen the planet of Sentmar, and Astra has sensed for a while--the Delmari are hers. She can't turn her back on them, deliver them to justice, even though they'd turned from her many years ago. A pain that still rips her heart in two. Torran and Rhydan knew the road to claiming their Consortress would not be an easy one. After all, a painful lie had driven her away, causing her to believe they didn't burn for her. Weren't consumed by her. But when she chooses to save them rather than honor her duty, the Wizards have the chance to show Astra she's always been the only one they desire.

Very complete and comprehensive manual for the service and repair of all large Marine Diesel Engines. Reprint of the original book from 1946.

Worldwide interest in the applications of evolutionary computing techniques to the design of engineering and information systems grows each day. Pattern recognition, control systems, factory scheduling, automation, generation of computer programs, and the design of intelligent paradigms all benefit from evolutionary techniques--their potential applications indeed seem limited only by the imaginations of scientists and engineers. This is an area of intensive research and development, and evolutionary computing techniques are themselves constantly evolving. It becomes important, then, that computer scientists and applications engineers have a working knowledge of the techniques, stay abreast of recent advances, and have the opportunity to incorporate them into their own systems and designs. *Evolution of Engineering and Information Systems and Their Applications* fills this need by providing an overview of the field and offering state-of-the-art reviews of the most important techniques and applications of evolutionary computing. The top experts from around the world discuss developments in genetic algorithms, genetic programming, and evolutionary strategies and applications including VLSI CAD, robot sensors, neural networks, and fuzzy classification systems. This is a new and very hot field, yet there are few--if any--resources that document and disseminate its advances. With *Evolution of Engineering and Information Systems and Their Applications*, you have the opportunity to learn from the leading authorities, use these powerful techniques to improve your own systems, and help evolutionary computing reach its nearly boundless potential.

This work looks at conflicts between the Hutu and the Tutsi in Burundi. It is also a profile of the Hutu and the Tutsi as a people. They are two social groups which claim separate identities on ethnic or tribal basis although they speak the same language and have the same culture. The work also looks at conflicts in eastern Congo which led to the downfall of President Mobutu Sese Seko of what was then known as Zaire. The author also looks at attempts by regional neighbours to resolve the conflict between the Hutu and Tutsi in Burundi, especially the role played by Tanzania and its former president, Julius Nyerere, who was the chief mediator. Most of Burundi's exports and imports go through Tanzania, giving the country leverage as the main facilitator of the peace process which sometimes has involved economic sanctions against Burundi. The conflict between the Hutu and the Tutsi is one of Africa's intractable problems. It is also one of the oldest in the post-colonial era. The book sheds some light on the complex situation in Burundi and on relations between the two groups. It also provides some insights into what can be done to resolve one of Africa's perennial problems. It can also be helpful to those who are trying to learn about Burundi for the first time. Students of African studies may also find this work to be useful.

The Craft meets Practical Magic. On her arrival in Ferntree Falls, Alexandria knows something is amiss. Not only does Andrew, her new best friend disappear in the sunlight, but someone Alexandria thought she could trust is trying to kill her! Perhaps leaving Catnip Cottage and the Barnabys wasn't such a great idea after all. What a delightfully magical read! For the young at heart or others who don't fear to dream. I enjoyed it so much! The wonderfully created world that you have so vividly written is easily envisaged! Katrina Whittaker.
