This service manual is divided into three sections. The first is for general running and operation of the motor, which includes: how to mount the motor on your transom, starting procedures, running the motor in different weather conditions, general information and maintenance. The next section is on how to trouble-shoot a non-working engine and gives some suggestions on what to look for. The third and final section is on servicing and the technical repair for different sections or parts of the motor.
