Secrets To Happiness Sarah Dunn

Sarah Dunn is a truly talented writer. Her writing is witty, lively, and flows beautifully. However, for me, Secrets to Happiness wasn't the book to showcase that talent. In fairness, let me start off by saying that I am probably outside of the target demographic of this book.

Deftly mixing humor and pathos, Sarah Dunn's Secrets to Happiness delivers an entertaining story of professional women living the city life. It has been likened to a hybrid of Candace Bushnell, Edith Wharton, and Jane Austen, and Kirkus Reviews calls it a "smart chick-lit tale with dark undertones."

Holly Frick has just endured the worst kind of breakup: the kind where you're still in love with the person leaving you. While her wounds are still dangerously close to the surface, her happily married best friend confesses over a bottle of wine that she is this close to having an affair. And another woman comes to Holly for advice about her love life--with Holly's ex! Holly decides that if everyone around her can take pleasure wherever they find it, so will she. As any self-respecting 30ish New York woman would do, she brings two males into her life: a flawed but endearing dog, and a good natured, much younger lover. She's soon entangled in a web of emails, chance meetings, and misguided good intentions and must forge an entirely new path to Nirvana. From the author of The Big Love, Secrets to Happiness is a big-hearted, knife-sharp, and hilariously entertaining story about the perils of love and friendship, sex and betrayal--and a thoroughly modern take on our struggle to be happy.

National Bestseller A hilarious and emotionally charged novel about a couple who embark on an open marriage--what could possibly go wrong? Lucy and Owen, ambitious, thoroughly-therapized New Yorkers, have taken the plunge, trading in their crazy life in a cramped apartment for Beekman, a bucolic Hudson Valley exurb. They've got a two hundred year-old house, an autistic son obsessed with the Titanic, and 17 chickens, at last count. It's the kind of paradise where stay-at-home moms team up to cook the school's "hot lunch," dads grill grass-fed burgers, and, as Lucy observes, "chopping kale has become a certain kind of American housewife's version of chopping wood." When friends at a wine-soaked dinner party reveal they've made their marriage open, sensible Lucy balks. There's a part of her, though--the part that worries she's become too comfortable being invisible--that's intrigued. Why not try a short marital experiment? Six months, clear ground rules, zero questions asked. When an affair with a man in the city begins to seem more enticing than the happily-ever-after she's known for the past nine years, Lucy must decide what truly makes her happy--"real life," or the "experiment?"

Devastated by her divorce from a husband she still loves, Holly occupies herself by interfering in the lives of her closest friends and finds her well-intentioned advice backfiring when she plays therapist to her ex's new girlfriend while simultaneously falling for her married friend's lover.

When the last thing you want is the one thing you need, you've got to have a little faith.... Growing up, Ellen Carlisle was a Christian: She went to Jesus camp, downed stale Nilla Wafers at Sunday school, and never, ever played with Ouija boards. Now, years later, when infertility prevents her from giving her ambitious attorney husband a family, she finds herself on the brink of divorce, unemployed, and living with her right-wing, born-again Christian parents in her suburban New Jersey hometown. There the schools are private, the past is public, and blessings come in lump sums. Then Ellen meets a man to whom she believes she can open her heart, and she begins to think that maybe it's true that everything happens for a reason--until all that was going well starts going very badly and Ellen is finally forced to dig deep to find her own brand of faith.

If you think money can't buy happiness, you're not spending it right. Two rising stars in behavioral science explain how money can buy happiness--if you follow five core principles of smarter spending. If you think money can't buy happiness, you're not spending it right. Two rising stars in behavioral science explain how money can buy happiness--if you follow

five core principles of smarter spending. Happy Money offers a tour of new research on the science of spending. Most people recognize that they need professional advice on how to earn, save, and invest their money. When it comes to spending that money, most people just follow their intuitions. But scientific research shows that those intuitions are often wrong. Happy Money explains why you can get more happiness for your money by following five principles, from choosing experiences over stuff to spending money on others. And the five principles can be used not only by individuals but by companies seeking to create happier employees and provide “happier products” to their customers. Elizabeth Dunn and Michael Norton show how companies from Google to Pepsi to Crate & Barrel have put these ideas into action. Along the way, the authors describe new research that reveals that luxury cars often provide no more pleasure than economy models, that commercials can actually enhance the enjoyment of watching television, and that residents of many cities frequently miss out on inexpensive pleasures in their hometowns. By the end of this book, readers will ask themselves one simple question whenever they reach for their wallets: Am I getting the biggest happiness bang for my buck?
