The Churches of Christ and Christian Churches comprise two of the principle fellowships to evolve from the American Restoration Movement—a movement fueled by the desire to abolish denominational borders and boundaries that have long divided the Christian community in hopes of building a brotherhood inclusive of all genuine followers of Jesus Christ. Nearly two centuries later, however, many within these two fellowships have abandoned the work of restoration and the hope of a united Christian fellowship. In *Restoring the Restoration Movement*, authors N.R. Kehn and Scott Bayles, with clever insight and a conversational tone, take a look "under the hood" at many of the doctrines that have divided the Churches of Christ and Christian Churches from each other and from mainstream evangelical Christianity in general—all in hopes of returning to the on-going work of restoration and to the original ideals of the Restoration Movement and true Biblical Christianity. N.R. Kehn has been a longtime member of Churches of Christ. With a secular degree in Network Administration and ongoing education in Software Engineering, Nathan combines impeccable logic with diligent Bible study. He currently serves in various capacities at the Florissant Church of Christ in Saint Louis, MO, where he also resides with his two sons, Nathan II and D.W. Scott Bayles is a graduate of Freed-Hardeman University and has preached for numerous Churches of Christ within the United States and abroad. He is also the author of *The Greatest Commands: Learning to Love like Jesus*. Currently, he serves as the preaching minister for First Christian Church of Rosiclare, IL, where he lives with his wife and two children.

i've got peter gabriel's "I Don't Remember" going thru my head this morning . . . and most of yesturday, and the day before. it seems important to some part of my soul which sits with signs and applause everytime it goes thru my head. they like the drive of the artist's expression of frustration and anxiety which comes thru in a manic crazyness. the song is an example of something that flashes us spiritually . . . maybe unlike a man in a trenchcoat . . . wearing shorts with a tee-shirt . . . flashing us briefly (ow!) as we walk by. the words "believe in god" embelished on his shirt echo on the canvas of the imagination. it doesn't matter if we turn around, run after him and chide him in his actions. it doesn't matter if by doing this it puts him in the same alagory as a pervert . . . and by action, god as well. ultimately tho, the tired, worn out god, quietly sitting in a courner, desperatly trying to believe in himself . . . probably wondering how valid this whole soap opera is, and whether or not spiritual flashers help or hurt his cause. now i got one of the songs from "the last temptation of christ" going thru my head . . . soundtrack ala peter gabriel as well. another spiritual flasher . . . who, jesus or peter gabriel? both an arrow pointing at a path to be walked . . . or a voice to listen to . . . or a feeling to behold. the hardest part is opening your heart up to the option. the option to be open. ( . . . maybe it's god that's trying to get into a working relationship with us and it's us that flinch and put it back up on a pedistal.) . . . why pursue it then? the path. you might accidently get superpowers or something . . . start levitating, healing the sick, curing the blind. become an issue . . . to be delt with by turkeys that can't fly. walk around, wonder when thanksgiving is. wonder if you look like a turkey. if you are a turkey walking around with turkeys talking turkey talk about how great it is to be a turkey . . . waiting for other turkeys to come over and watch turkey friends on turkey tv. and each turkey has the same turkey right to talk turkey to any turkey it wants in a frantic pace with a frantic face . . . then it's a good turkey day to be a turkey. gobble it up the daily rut. question your life avoid the knife. be not a turkey entwined behind the line of commonality to turkey HQ. after awhile, you fall into the style. you are accepted, people talk to you. and you find flaws in the turkey tune.

Keith McCord recounts the history of automotive onboard diagnostic systems and creation of the rudimentary OBD I systems and the development as well as the evolution of OBD II. Currently, OBD-II (OnBoard Diagnostic II) is the standard of the industry, and this book provides a thorough explanation of this system. It details its main features, capabilities, and characteristics. It shows how to access the port connector on the car, the serial data protocols, and what the serial data means. To understand the diagnostic codes, the numbering system is defined and the table of common DTCs is shown. But most importantly, McCord provides a thorough process for trouble shooting problems, tracing a problem to its root, explaining why DTCs may not lead to the source of the underlying problem, and ultimately resolving the problem.

Of course, his perception was thrown slightly off center by the mysterious young woman, Casandra Blankenship.
