As in previous editions, the focus in PREALGEBRA & INTRODUCTORY ALGEBRA, remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. The role of active participant is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately work similar problems, helps them build their confidence and eventually master the concepts. To this point, simplicity plays a key factor in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully-constructed hierarchy of objectives. This objective-based approach not only serves the needs of students, in terms of helping them to clearly organize their thoughts around the content, but instructors as well, as they work to design syllabi, lesson plans, and

other administrative documents. The Second Edition features a new design, enhancing the Aufmann Interactive Method and the organization of the text around objectives, making the pages easier for both students and instructors to follow. Barron's Let's Review Regents: Chemistry gives students the step-by-step review and practice they need to prepare for the Regents Chemistry/Physical Setting exam. This updated edition is an ideal companion to high school textbooks and covers all Chemistry topics prescribed by the New York State Board of Regents. All Regents test dates for 2020 have been canceled. Currently the State Education Department of New York has released tentative test dates for the 2021 Regents. The dates are set for January 26–29, 2021, June 15–25, 2021, and August 12–13th. Let's Review Regents: Chemistry covers all high school-level Chemistry topics and includes: Extensive review of all topics on the test Extra practice questions with answers A detailed introduction to the Regents Chemistry course and exam One actual, recently released, Regents Chemistry exam with an answer key Looking for additional practice and review? Check out Barron's Regents Chemistry Power Pack two-volume set, which includes Regents Exams and Answers: Chemistry in addition to Let's Review Regents: Chemistry.

Prepare for success in precalculus as Larson's PRECALCULUS WITH LIMITS, 5th Edition provides specially developed ongoing review in addition to clear explanations, real examples and exercises that relate to everyday life. Written by an award-winning author recognized for his reader-friendly approach, this edition provides a brief review of core algebra topics and coverage of analytic geometry in three dimensions in addition to an introduction of concepts covered in calculus. Updated with proven learning design principles, this edition's consistently structured explanations and carefully written exercises help remove barriers to learning for an inclusive learning experience. New Review & Refresh exercises help you prepare for each section with a general skill review, while How Do You See It? exercises give you practice applying concepts. In addition, new Summarize features and Checkpoint problems reinforce your understanding of skill sets and let you check your mastery of the concepts. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Larson's ALGEBRA AND TRIG is ideal for a two-term course and is known for delivering sound, consistently structured explanations and carefully written exercises of mathematical concepts. Updated and refined through learning design principles, the 11th edition removes barriers to learning and offers a carefully planned and inclusive experience for all students. New Review & Refresh exercises prepare students for

The most practical leadership textbook on the market, LEADERSHIP 6e uses a unique three-pronged approach to teach leadership concepts and theory. The authors combine traditional theory with cutting-edge leadership topics in a concise presentation packed with real-world examples. The text puts students in the leadership role, engaging them in applying the concepts and providing step-by-step behavior models for effectively handling leadership functions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The FUNDAMENTALS OF MATHEMATICS, Tenth Edition, offers a comprehensive and objectives-based review of all basic mathematics concepts. The authors prepare students for further coursework by addressing three important student needs: 1) establishing good study habits and overcoming math anxiety, 2) making the connections between mathematics and their modern, day-to-day activities, and 3) being paced and challenged according to their individual level of understanding whether right out of high school or returning to school later in life. The clear exposition and the consistency of presentation make learning arithmetic accessible for all. Key concepts presented in section objectives and further defined within the context of How and Why provide a strong foundation for learning and lasting comprehension. With a predominant emphasis on problem-solving skills, concepts, and applications based on real world data (with some introductory algebra integrated throughout), this book is suitable for individual study or for a variety of course formats: lab, self-paced, lecture, group, or combined formats. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
