ECPA BESTSELLER • A compelling emotional and spiritual case against hurry and in favor of a slower, simpler way of life "As someone all too familiar with 'hurry sickness,' I desperately needed this book."—Scott Harrison, New York Times best-selling author of Thirst "Who am I becoming?" That was the question nagging pastor and author John Mark Comer. Outwardly, he appeared successful. But inwardly, things weren't pretty. So he turned to a trusted mentor for guidance and heard these words: "Ruthlessly eliminate hurry from your life. Hurry is the great enemy of the spiritual life." It wasn't the response he expected, but it was—and continues to be—the answer he needs. Too often we treat the symptoms of toxicity in our modern world instead of trying to pinpoint the cause. A growing number of voices are pointing at hurry, or busyness, as a root of much evil. Within the pages of this book, you'll find a fascinating roadmap to staying emotionally healthy and spiritually alive in the chaos of the modern world.

When Gandhi as a young lawyer in South Africa began fashioning the tenets of his political philosophy, he was absorbed by a seemingly unrelated enterprise: creating a newspaper, Indian Opinion. In Gandhi's Printing Press Isabel Hofmeyr provides an account of how this footnote to a career shaped the man who would become the world-changing Mahatma.

In the tradition of such trailblazing books as No Logo and The Tipping Point, In Praise of Slow heralds a growing international movement of people dedicated to slowing down the pace of our contemporary times and enjoying a richer, fuller life as a result. These days, almost everyone complains about the hectic pace of their lives. We live in a world where speed rules and everyone is under pressure to go faster. But when speed is king, anyone or anything that gets in our way, that slows us down, becomes an enemy. Thanks to speed, we are living in the age of rage. Carl Honore has discovered a movement that is quickly working its way into the mainstream. Groups of people are developing a recipe for living better in a fast-paced, modern environment by striving for a new balance between fast and slow. In an entertaining and hands-on investigation of this new movement, Honore takes us from a Tantric sex workshop in a trendy neighbourhood in London, England to Bra, Italy, the home of the Slow Food, Slow Cities and Slow Sex movements. He examines how we can continue to live productive lives by embracing the tenets of the slow movement. A challenging take on the cult of speed, as well as a corrective look at how we can approach our lives with new understanding, In Praise of Slow uncovers a movement whose time has come.

Slow Looking provides a robust argument for the importance of slow looking in learning environments both general and specialized, formal and informal, and its connection to major concepts in teaching, learning, and knowledge. A museum-originated practice increasingly seen as holding wide educational benefits, slow looking contends that patient, immersive attention to content can produce active cognitive opportunities for meaning-making and critical thinking that may not be possible through high-speed means of information delivery. Addressing the multi-disciplinary applications of this purposeful behavioral practice, this book draws examples from the visual arts, literature, science, and everyday life, using original, real-world scenarios to illustrate the complexities and rewards of slow looking.
