The enchanting town of Sawyerton Springs does exist. New York Times best-selling author Andy Andrews has found it in the hearts of those who long to take a deep breath, relax, and take the time to find the humor and meaning in everyday life. There's a little bit of this small town in all of us - a place apart, "behind the times," inhabited by a cast of characters we seem to have known for years. The sounds, smells, colors, and textures of Sawyerton Springs are within you - an instinctive, almost mystical longing for a simpler time. In Sawyerton Springs, everyday occurrences are assigned a calm purpose. The town has no lawyers - it doesn't need any. The local paper comes out weekly, and everyone already knows what it says. Email, the Internet, computers, faxes, cell phones, microwaves, cappuccinos, call waiting, and caller ID don't exist here. The town has no traffic lights - there aren't enough cars to warrant any. This is a story that reflects upon the seemingly ordinary parts of our everyday lives - and how they are actually extraordinary parts of something much greater. Savor the time you spend in Sawyerton Springs. You might just find another hometown you want to claim as your own!

Awakening in a bleak landscape, Cass Dollar vaguely recalls enduring something terrible. Having no idea how many days—or weeks—have passed, she slowly realizes the horrifying truth: her daughter, Ruthie, has vanished. And with her, nearly all of civilization. Instead of winding through the once-lush hills, the roads today see only cannibalistic Beaters—people turned hungry for human flesh by a government experiment gone wrong. In a broken, barren California, Cass will undergo a harrowing quest to get Ruthie back. Few people trust an outsider—much less one who bears the telltale scars of a Beater attack—but she finds safety with an enigmatic outlaw, Smoke. And she'll need him more than ever when his ragged band of survivors learn that she and Ruthie have become the most feared, and desired, weapons in a brave new world....

In Taking the Path of Zen, Robert Aitken provided a concise guide to zazen (Zen meditation) and other aspects of the practice of Zen. In The Mind of Clover he addresses the world beyond the zazen cushions, illuminating issues of appropriate personal and social action through an exploration of the philosophical complexities of Zen ethics. Aitken's approach is clear and sure as he shows how our minds can be as

nurturing as clover, which enriches the soil and benefits the environment as it grows. The opening chapters discuss the Ten Grave Precepts of Zen, which, Aitken points out, are "not commandments etched in stone but expressions of inspiration written in something more fluid than water." Aitken approaches these precepts, the core of Zen ethics, from several perspectives, offering many layers of interpretation. Like ripples in a pond, the circles of his interpretation increasingly widen, and he expands his focus to confront corporate theft and oppression, the role of women in Zen and society, abortion, nuclear war, pollution of the environment, and other concerns. *The Mind of Clover* champions the cause of personal responsibility in modern society, encouraging nonviolent activism based on clear convictions. It is a guide that engages, that invites us to realize our own potential for confident and responsible action.

A collection of eight critical essays on the classical tragedy, arranged in the chronological order of their original publication.

This second edition of *Reclaiming a Scientific Anthropology* arrives at just the right time, as new advances in science increasingly affect anthropologists of all stripes. Lawrence Kuznar begins by reviewing the basic issues of scientific epistemology in anthropology as they have taken shape over the life of the discipline. He then describes postmodern and other critiques of both science and scientific anthropology, and he concludes with stringent analyses of these debates. This new edition brings this important text firmly into the 21st century; it not only updates the scholarly debates but it describes new research techniques—such as computer modeling systems—that could not have been imagined just a decade ago. In a field that has become increasingly divided over basic methods of research and interpretation, Kuznar makes a powerful argument that anthropology should return to its roots in empirical science.

Utilizing a clear, concise writing style, and a use of relevant, real world examples, Soo Tan introduces abstract mathematical concepts with his intuitive approach that brings abstract ideas to life.

Christian Spirituality

The most authoritative text available on the purposes, processes and mechanics of human evolution, preparation for the monumental events that will occur between 2000-2017, humanity's true origins and evolutionary destiny and the hidden purposes for the New Age Movement. Detailed information on Keylontic Morphogenetic Science, time mechanics, interdimensional planetary evolution, the science of Dimensional Ascension, integration of multi-dimensional identity, DNA mechanics and accelerated biological and spiritual evolution. Introduces a comprehensive model of 15-dimensional universal physics and the corresponding 15 Primary Chakra System and 12-strand DNA Silicate Matrix gene code. Discover the secrets of humanity's evolutionary destiny that have been hidden within our ancient, traditional and New Age sacred mystical and religious teachings.
