A groundbreaking book with an inside-out view of personal transformation and the path to everyday enlightenment by letting go of the clutter, defense, and fears to instead focus on building the courage to be honest, vulnerable, authentic, and super-clear. Following the bestsellers *The Intuitive Way*, *Frequency*, and *Leap of Perception*, *Transparency* is the next book in Penney Peirce's award-winning, visionary series of guidebooks on personal and societal transformation. Timely and revolutionary, Penney shows us how to let go of everything that gets in our way—the obstacles, clutter, and fears—to truly achieve greater authenticity, clarity of purpose, and feelings of belonging and joy. By transforming our opaque reality into a state of transparency, the dividing lines that fragment and isolate us melt away and all that's left is the true self—connecting us to everything and everyone. Transparency helps you learn that when you're transparent, there is great power in being seen for all of who you are. Secrets, lies, and hiding are no longer functional. Honesty,

simplicity, compassion, and true humility produce genius. And, when you're transparent, you're empowered to see through situations that blind and confuse others. It's as though you suddenly have Superman's X-ray vision, and this enables you to reach just-right solutions, insights, and develop your ability to "see through," so your intuition can skyrocket. Prescriptive, accessible, and thought-provoking, Transparency aims to help you identify your soul-blocking habits, find the insights being masked, and return these negative patterns back into the clear light of the unified field. Each piece of clutter dissolved, understood, and released creates greater transparency, opening us to experience our true selves and all the joys of life.

This book highlights cutting-edge research on various aspects of human-computer interaction (HCI). It includes selected research papers presented at the Third International Conference on Computing, Communication and Signal Processing (ICCASP 2018), organized by Dr. Babasaheb Ambedkar Technological University in Lonere-Raigad, India on January 26-27, 2018. It covers pioneering topics in the field of computer, electrical, and electronics engineering, e.g. signal and image processing, RF and microwave engineering, and emerging technologies such as IoT, cloud computing, HCI, and green computing. As such, the book offers a valuable guide for all scientists, engineers and research students in the areas of engineering and technology.

A common man's journey... YOUR ROAD MAP TO ACHIEVING FINANCIAL FREEDOM AND LIVING YOUR DREAMS Financial freedom is not defined by your net worth or your social status. It does not matter how much you earn - what matters is how much you can save and invest wisely. The secret to financial freedom is learning the basic concepts of planning well and adopting the right attitude. But how does one achieve this? Written by a common man for the common man, this book will help you lead a financially independent and conscious life. Everyone around us is trapped in a mindless rat race. If you've resolved to take control of your finances and construct a personal finance plan, From the Rat Race to Financial Freedom is a good starting point.
