Stephen Hawking was recognized as one of the greatest minds of our time and a figure of inspiration after defying his ALS diagnosis at age twenty-one. He is known for both his breakthroughs in theoretical physics as well as his ability to make complex concepts accessible for all, and was beloved for his mischievous sense of humor. At the time of his death, Hawking was working on a final project: a book compiling his answers to the "big" questions that he was so often posed--questions that ranged beyond his academic field. Within these pages, he provides his personal views on our biggest challenges as a human race, and where we, as a planet, are heading next. Each section will be introduced by a leading thinker offering his or her own insight into Professor Hawking's contribution to our understanding. The book will also feature a foreword from Academy Award winning actor Eddie Redmayne, who portrayed Hawking in the film The Theory of Everything, and an afterword by Hawking's daughter, Lucy Hawking, as well as personal photographs and additional archival material.

Bishop's text shows students how to break the material of preparatory chemistry down and master it. The system of objectives tells the students exactly what they must learn in each chapter and where to find it.

In recent years there has been a bold revival in the field of natural theology, where " natural theology " can be understood as the attempt to demonstrate that God exists by way of reason, evidence, and argument without the appeal to divine revelation. Today's practitioners of natural theology have not only revived and recast all of the traditional arguments in the field, but, by drawing upon the findings of contemporary cosmology, chemistry, and biology, have also developed a range of fascinating new ones. Contemporary Arguments in Natural Theology brings together twenty experts working in the field today. Together, they practice natural theology from a wide range of perspectives, and show how the field of natural theology is practiced today with a degree of diversity and confidence not seen since the Middle Ages. Aimed primarily at advanced undergraduates and graduate students, the volume will also be of interest to researchers in philosophy, theology, biblical studies, and religious studies, as an indispensable resource on contemporary theistic proofs.

A cutting-edge survey of contemporary thought at the intersection of science and Christianity. Provides a cutting-edge survey of the central ideas at play at the intersection of science and Christianity through 54 original articles by world-leading scholars and rising stars in the discipline Focuses on Christianity's interaction with Science to offer a fine-grained analysis of issues such as multiverse theories in cosmology, convergence in evolution, Intelligent Design, natural theology, human consciousness, artificial intelligence, free will, miracles, and the Trinity, amongst many others Addresses major historical developments in the relationship between science and Christianity, including Christian patristics, the scientific revolution, the reception of Darwin, and twentieth century fundamentalism Divided into 9 Parts: Historical Episodes; Methodology; Natural Theology; Cosmology & Physics; Evolution; The Human Sciences; Christian Bioethics; Metaphysical Implications; The Mind; Theology; and Significant Figures of the 20th Century Includes diverse perspectives and broadens the conversation from the Anglocentric tradition

In this broad, comprehensive introduction to Christianity, Dr. Ekstrand explores science, philosophy, Scripture, the teachings of Jesus Christ, the message of the apostles, and the essence of orthodox Christianity as represented by both Catholic and Protestant traditions. (Christian)
