NATIONAL BESTSELLER • " A startling vision of what the cycles of history predict for the future. " —USA Weekend William Strauss and Neil Howe will change the way you see the world—and your place in it. With blazing originality, The Fourth Turning illuminates the past, explains the present, and reimagines the future. Most remarkably, it offers an utterly persuasive prophecy about how America 's past will predict its future. Strauss and Howe base this vision on a provocative theory of American history. The authors look back five hundred years and uncover a distinct pattern: Modern history moves in cycles, each one lasting about the length of a long human life, each composed of four eras—or "turnings"—that last about twenty years and that always arrive in the same order. In The Fourth Turning, the authors illustrate these cycles using a brilliant analysis of the post-World War II period. First comes a High, a period of confident expansion as a new order takes root after the old has been swept away. Next comes an Awakening, a time of spiritual exploration and rebellion against the now-established order. Then comes an Unraveling, an increasingly troubled era in which individualism triumphs over crumbling institutions. Last comes a Crisis—the Fourth Turning—when society passes through a great and perilous gate in history. Together, the four turnings comprise history's seasonal rhythm of growth, maturation, entropy, and rebirth. The Fourth Turning offers bold predictions about how all of us can prepare, individually and collectively, for America 's next rendezvous with destiny.

Predicts that the U.S. will face a crisis in the next millennium that will threaten the country's survival

Hailed by national leaders as politically diverse as former Vice President Al Gore and former House Speaker Newt Gingrich, Generations has been heralded by reviewers as a brilliant, if somewhat unsettling, reassessment of where America is heading. William Strauss and Neil Howe posit the history of America as a succession of generational biographies, beginning in 1584 and encompassing every-one through the children of today. Their bold theory is that each generation belongs to one of four types, and that these types repeat sequentially in a fixed pattern. The vision of Generations allows us to plot a recurring cycle in American history -- a cycle of spiritual awakenings and secular crises -- from the founding colonists through the present day and well into this millenium. Generations is at once a refreshing historical narrative and a thrilling intuitive leap that reorders not only our history books but also our expectations for the twenty-first century.

It's nearing midnight in Wyoming, where four young conservatives have gathered at a backyard after-party. They've returned home to toast their mentor Gina, newly inducted as president of a tiny Catholic college. But as their reunion spirals into spiritual chaos and clashing generational politics, it becomes less a celebration than a vicious fight to be understood. On a chilly night in the middle of America, Will Arbery's haunting play offers grace and disarming clarity, speaking to the heart of a country at war with itself.

Chris Hedges on the most taboo topics in America, with David Talbot. The War on Terror is a profitable crusade against convenient enemies. " Muslim rage " is an understandable response to US state terror. Rising oligarchy in America has made democracy a sham and turned the electoral process into an increasingly absurd circus. Police violence against minorities is part of a systematic effort to crush social discontent. Proliferating violence against women 's health clinics is part of the war on women 's bodies. Freedom of speech is an illusion, with government agencies and corporate media dictating acceptable boundaries of public discourse. America 's only hope is a revolution to create genuine structures of popular power. This kind of insight into America 's deeply troubled current state cannot be found on television, in the pages of leading newspapers, or on Google News. Many of our most important thinkers are relegated to the shadows because their ideas are deemed too radical—or true—for public consumption. Among these intellectual bomb throwers is Chris Hedges, who, after decades on the front lines, continues to confront power in America in the most incisive, challenging ways. Hedges 's unflinching conversation with Hot Books editorial director David Talbot— founder of Salon and author of New York Times bestseller, The Devil 's Chestboard: Allen Dulles, the CIA and the Rise of America 's Secret Government—will be the first in a series for Hot Books called " Unspeakable, " featuring some of the most important — and censored — voices in the world today.
