Fashion Thinking is a groundbreaking investigation into the thinking behind the fashion design process.

Bridging theory and practice, this accessible text provides an introduction to fashion from both cultural studies and fashion studies perspectives, and addresses the growing interaction between the two fields. Cultural studies relies on fashion to exemplify change as well as continuity, examine identity and difference, agency and structure, and production and consumption. Fashion, meanwhile, benefits from the interpretative lens of cultural studies; its key concepts, contextual flexibility, and attention to bridging 'high' and 'popular' culture, contemporary and historical perspectives, and diverse identity issues and methodologies. Organised thematically, the book uses a wide range of cross-cultural case studies to explore ethnicity, class, gender and nation through fashion, and explains the ways in which these notions interact and overlap. Drawing on intersectionality theory in feminist theory and cultural studies, Fashion and Cultural Studies is essential reading for students and scholars.

This thoroughly revised and updated edition of Fashion Theory: A Reader brings together and presents a wide range of essays on fashion theory that will engage and inform both the general reader and the specialist student of fashion. From apparently simple and accessible theories concerning what fashion is to seemingly more difficult or challenging theories concerning globalisation and new media, this collection contextualises different theoretical approaches to identify, analyse and explain the remarkable diversity, complexity and beauty of what we understand and experience every day as fashion and clothing. This second edition contains entirely new sections on fashion and sustainability, fashion and globalisation, fashion and digital/social media and fashion and the body/prosthesis. It also contains updated and revised sections on fashion, identity and difference, and on fashion and consumption and fashion as communication. More specifically, the section on identity and difference has been updated to include contemporary theoretical debates surrounding Islam and fashion, and LGBT+ communities and fashion and the section on consumption now includes theories of 'prosumption'. Each section has a specialist and dedicated Editor's Introduction which provides essential conceptual background, theoretical contextualisation and critical summaries of the readings in each section. Bringing together the most influential and ground breaking writers on fashion and exposing the ideas and theories behind what they say, this unique collection of extracts and essays brings to light the presuppositions involved in the things we all think and say about fashion. This second edition of Fashion Theory: A Reader is a timeless and invaluable resource for both the general reader and undergraduate students across a range of disciplines including sociology, cultural studies and fashion studies.

This new edition of a classic work offers a concise introduction to the sociology of fashion, and demystifies the workings of the fashion system. From the origins of fashion studies and the difference between clothing and fashion, through to an examination of 21st century subcultures, and the impact of the digital age on designers, Fashion-ology explores fashion as a global, social construct. With accessible overviews of key debates, issues and perspectives, the book provides a complete exploration of the field, and features a wide range of international case studies which bring the theory to life. Updated with two new chapters on subcultures and the impact of technology, along with guides to further reading and a student guide to sociological research in fashion, this is essential reading for anyone studying fashion, sociology, anthropology, and cultural studies.

When Adorned in Dreams was first published in 1985, Angela Carter described the book as "the best I have read on the subject, bar none." From haute couture to haberdashery, "deviant" dress to Dior, Elizabeth Wilson traces the social and cultural history of fashion and its complex relationship to modernity. She also discusses fashion's vociferous opponents, from the "dress reform" movement to certain strands of feminism. Wilson delights in the power of fashion to mark out identity or subvert it. This brand new edition of her book follows recent developments to bring the story of fashionable dress up to date, exploring the grunge look inspired by bands like Nirvana, the "boho chic" of the mid 90's, retro-dressing, and the meanings of dress from the veil to soccer player David Beckham's pink-varnished toenails.

Drawing on interviews with designers and fashion editors, Davis shows, in this provocative look at what we do with our clothes, how our ambivalent world reveals itself through fashion. He sets out to answer questions such as 'what do our clothes say about who we are or who we think we are?', and 'how does the way we dress communicate messages about our identities?', and demonstrates that much of what we assume to be individual preference really reflects deeper social and cultural forces, characterised by tensions over gender roles, social status and the expression of sexuality.

What kinds of things do fashion and clothing say about us? What does it mean to wear Gap or Gaultier, Millets or Moschino? Are there any real differences between Hip-Hop style and Punk anti-styles? In this fully revised and updated edition, Malcolm Barnard introduces fashion and clothing as ways of communicating and challenging class, gender, sexual and social identities. Drawing on a range of theoretical approaches from Barthes and Baudrillard to Marxist, psychoanalytic and feminist theory, Barnard addresses the ambivalent status of fashion in contemporary culture.
