This comprehensive and accessible book is designed for use by students following the Theory of Knowledge course in the International Baccalaureate (IB) Diploma Programme. The book is also useful for students following other critical thinking courses. The fundamental question in Theory of Knowledge is How do you know? In exploring this question, the author encourages critical thinking across a range of subject areas and helps students to ask relevant questions, use language with care and precision, support ideas with evidence, argue coherently and make sound judgements.

Build confidence in a range of key Theory of Knowledge skills with this practical companion, full of advice and guidance from an experienced TOK expert. · Build confidence in applying analytical skills with Deeper Analysis, showing you how to go beyond simply identifying and explaining · Develop awareness of the practical application of knowledge with In Practice pointers, offering guidance on how topics can be used in TOK activities · Improve skills for formulating genuine knowledge questions for use in activities, a crucial part of assessment success · Avoid making the mistakes that others make in the assessment with TOK Traps that highlight common errors and misconceptions.

Creoles have long been the subject of debate in linguistics, with many conflicting views, both on how they are formed, and what their political and linguistic status should be. Indeed, over the past twenty years, some creole specialists have argued that it has been wrong to think of creoles as anything but language blends in the same way that Yiddish is a blend of German and Hebrew and Slavic. Here, John H. McWhorter debunks the most widely accepted idea that creoles are created in the same way as 'children', taking characteristics from both 'parent' languages, and its underlying assumption that all historical and biological processes are the same. Instead, the facts support the original, and more interesting, argument that creoles are their own unique entity and are among the world's only genuinely new languages.

The First International Conference on Pidgins and Creoles in Melanesia was planned mainly for Tok Pisin, but no predetermined theme(s) had been proposed to the participants. Nevertheless, in this collection of papers several principal themes stand out.One is that of a revived interest in substratology, both for Tok Pisin and for Bislama. Another is what in fact amounts to a change in perspective from universalism, as supposedly competitive with the substratological orientation, towards a generalist approach to typology, which reduces the apparent polarity, from a theoretical point of view. A third is the pervasive interest of contributors in wider language issues in the social and political life of Papua New Guinea.These interests go back to the linguistic and social experience of the participants, most of whom have a long record of living among the people whose languages they have studied on a day-to-day basis, and to the relative remoteness of their inspiration from the more theoretical and perhaps ultimately untestable issues which surround the universalist approach and its claims for a bioprogram foundation for language.

Jerry Fodor and Massimo Piattelli-Palmarini, a distinguished philosopher and scientist working in tandem, reveal major flaws at the heart of Darwinian evolutionary theory. They do not deny Darwin's status as an outstanding scientist but question the inferences he drew from his observations. Combining the results of cutting-edge work in experimental biology with crystal-clear philosophical argument they mount a devastating critique of the central tenets of Darwin's account of the origin of species. The logic underlying natural selection is the survival of the fittest under changing environmental pressure. This logic, they argue, is mistaken. They back up the claim with evidence of what actually happens in nature. This is a rare achievement - the short book that is likely to make a great deal of difference to a very large subject. What Darwin Got Wrong will be controversial. The authors' arguments will reverberate through the scientific world. At the very least they will transform the debate about evolution.

Plural? Monolithic? Legion? - Tom McArthur explores the nature of English in its local and global contexts.

Written by experienced practitioners this resource for Theory of Knowledge for the IB Diploma offers comprehensive coverage of and support for the new subject guide. Decoding Theory of Knowledge (ToK) is an accessible new resource that explores Areas of Knowledge, Ways of Knowing, Personal and Shared Knowledge, the Knowledge Framework and Knowledge Questions. The book offers extensive support on the new assessment criteria for the essay and presentation. Features include explanation of key concepts to consolidate knowledge and understanding; real-life situations to engage students; practical activities to develop students' thinking, writing and presentation skills; and top tips to provide further guidance and advice.

Veteran journalists Casey Sherman and Dave Wedge have written the definitive inside look at the Boston Marathon bombings with a unique, Boston-based account of the events that riveted the world. From the Tsarnaev brothers' years leading up to the act of terror to the bomb scene itself (which both authors witnessed first-hand within minutes of the blast), from the terrifying police shootout with the suspects to the ultimate capture of the younger brother, Boston Strong: A City's Triumph over Tragedy reports all the facts-and so much more. Based on months of intensive interviews, this is the first book to tell the entire story through the eyes of those who experienced it. From the cop first on the scene, to the detectives assigned to the manhunt, the authors provide a behind-the-scenes look at the investigation. More than a true-crime book, Boston Strong also tells the tragic but ultimately life-affirming story of the victims and their recoveries and gives voice to those who lost loved ones. With their extensive reporting, writing experience, and deep ties to the Boston area, Sherman and Wedge create the perfect match of story, place, and authors. If you're only going to read one book on this tragic but uplifting story, this is it.

In 1967, Kathrine Switzer was the first woman to officially run what was then the all male Boston Marathon, infuriating one of the event's directors who attempted to violently eject her. In what would become an iconic sports image, Switzer escaped and finished the race. This was a watershed moment for the sport, as well as a significant event in women's history. Including updates from the 2008 Summer Olympics, the paperback edition of Marathon Woman details the life of an incredible, pioneering athlete, and the lasting effect she's had on women's sports. Switzer's energy and drive permeate the pages of this warm, witty memoir as she describes everything from the childhood events that inspired her to succeed to her big win in the 1974 New York City Marathon, and beyond.
