Toshiba's 40E220U is a plain, average-looking TV. It's thick in bezel and depth, though it's still lightweight enough to tote around. It takes a very traditional, uncreative approach to port and controls placement, chancing nothing on being stylish or complex. The E220U is truly geared towards being a TV and nothing more.

This compelling novel follows four women as they learn to balance children, estranged husbands, boyfriends, and problems at work through their faith in God. Michelle, Tonya, Mrs. Judson, and Miz Ida, African-American, white, rich, poor -- they seemingly have nothing in common. Yet every day they face the complex realities of twenty-first-century urban life as they try to balance their needs with their belief in God. Through the course of a year, these women must come to terms with the past, discover their true identities, and recognize the unexpected miracles that reveal God's all-encompassing love. These four women entertain us and invite us to join in their lives. As they welcome us, they also introduce us to the men in their lives. The men play supporting roles, adding color and zest to the lives of the Cover Girls. Bishop Jakes knows the struggles real women encounter and the losses that make it difficult to face the future. He brings compassionate insight and deep wisdom to this novel and proves that he is not only a gifted preacher, but a born storyteller.

This text describes the functions that the BIOS controls and how these relate to the hardware in a PC. It covers the CMOS and chipset set-up options found in most common modern BIOSs. It also features tables listing error codes needed to troubleshoot problems caused by the BIOS.

In contrast to the close cooperation practiced among European states, space relations among Asian states have become increasingly tense. If current trends continue, the Asian civilian space competition could become a military race. To better understand these emerging dynamics, James Clay Moltz conducts the first in-depth policy analysis of Asia's fourteen leading space programs, concentrating especially on developments in China, Japan, India, and South Korea. Moltz isolates the domestic motivations driving Asia's space actors, revisiting critical events such as China's 2007 antisatellite weapons test and manned flights, Japan's successful Kaguya lunar mission and Kibo module for the International Space Station (ISS), India's Chandrayaan lunar mission, and South Korea's astronaut visit to the ISS, along with plans to establish independent space-launch capability. He investigates these nations' divergent space goals and their tendency to focus on national solutions and self-reliance rather than regionwide cooperation and multilateral initiatives. He concludes with recommendations for improved intra-Asian space cooperation and regional conflict prevention. Moltz also considers America's efforts to engage Asia's space programs in joint activities and the prospects for future U.S. space leadership. He extends his analysis to the relationship between space programs and economic development in Australia, Indonesia, Malaysia, North Korea, Pakistan, the Philippines, Singapore, Taiwan, Thailand, and Vietnam, making this a key text for international relations and Asian studies scholars.

This the shortest mainstream calculus book available. The authors make effective use of computing technology, graphics, and applications, and provide at least two technology projects per chapter. This popular book is correct without being excessively rigorous, up-to-date without being faddish. Maintains a strong geometric and conceptual focus. Emphasizes explanation rather than detailed proofs. Presents definitions consistently throughout to maintain a clear conceptual framework. Provides hundreds of new problems, including problems on approximations, functions defined by tables, and conceptual questions. Ideal for readers preparing for the AP Calculus exam or who want to brush up on their calculus with a no-nonsense, concisely written book.

Death is no stranger in the city of Erisin-- but some deaths attract more attention than others. When a prostitute dies carrying a royal signet, Isyllt Iskaldur, necromancer and agent of the Crown, is called to investigate. Her search leads to desecrated tombs below the palace, and the lightless vaults of the vampiric vrykoloi deep beneath the city. But worse things than vampires are plotting in Erisin... As a sorcerer plague sweeps the city and demons stalk the streets, Isyllt must decide who she's prepared to betray, before the city built on bones falls into blood and fire.

Perfect for fans of The Mortal Instruments and Wicked Lovely. The Three Immortal Blades is an urban action-packed series that you won't be able to put down! Awarded 'Best New Author of 2015' by AusRomToday and as seen in UK Glamour Magazine. Discover why readers can't put this action-packed series down. Karla Gray is an ordinary seventeen year old. At least, that's what she thought until she met Lucas. When her body starts reacting in weird ways and shutting down to the point of death, she quickly learns that her kidnapper might be her only fighting chance to stay alive. Karla is a Shielder; an exceptional fighter born with the rare ability to project a Shield for protection. Without her family and surrounded by an unknown institute, Karla must learn to fight and defend herself against the Starkorts who are hunting her. The war has been raging for centuries but Karla might be their last hope to end it all. Only if she can unravel the purpose of her curse and battle an unknown presence manipulating her thoughts; a mysterious woman who may be dormant for now, but has every intention of possessing Karla- mind, body, and soul. Within this new reality that Karla faces the search for the Three Immortal Blades begins.

User Interface Design and Evaluation provides an overview of the user-centered design field. It illustrates the benefits of a user-centered approach to the design of software, computer systems, and websites. The book provides clear and practical discussions of requirements gathering, developing interaction design from user requirements, and user interface evaluation. The book's coverage includes established HCI topics—for example, visibility, affordance, feedback, metaphors, mental models, and the like—combined with practical guidelines for contemporary designs and current trends, which makes for a winning combination. It provides a clear presentation of ideas, illustrations of concepts, using real-world applications. This book will help readers develop all the skills necessary for iterative user-centered design, and provides a firm foundation for user interface design and evaluation on which to build. It is ideal for seasoned professionals in user interface design and usability engineering (looking for new tools with which to expand their knowledge); new people who enter the HCI field with no prior educational experience; and software developers, web application developers, and information appliance designers who need to know more about interaction design and evaluation. Co-published by the Open University, UK. Covers the design of graphical user interfaces, web sites, and interfaces for embedded systems. Full color production, with activities, projects, hundreds of illustrations, and industrial applications.

Detailed examples and case studies make this the ideal hands-on guide to implementing Juniper Networks systems. It contains something for everyone, and covers all the basics for beginners while challenging experience users with tested configuration examples throughout the book.
