In 2016, Americans fed up with the political process vented that frustration with their votes. Republicans nominated for president a wealthy businessman and former reality show host best known on the campaign trail for his sharp rhetoric against immigration and foreign trade. Democrats nearly selected a self-described socialist who ran on a populist platform against the influence of big money in politics. While it is not surprising that Americans would channel their frustrations into votes for contenders who pledge to end business as usual, the truth is that we don't have to pin our hopes for greater participation on any one candidate. All of us have a say—if we learn, master and practice the skills of effective citizenship. One of the biggest roadblocks to participation in democracy is the perception that privileged citizens and special interests command the levers of power and that everyday Americans can't fight City Hall. That perception is undoubtedly why a 2015 Pew Charitable Trusts survey found that 74 percent of those Americans surveyed believed that most elected officials didn't care what people like them thought. Graham and Hand intend to change that conventional wisdom by showing citizens how to flex their citizenship muscles. They describe effective citizenship skills and provide tips from civic experts. Even more importantly, they offer numerous examples of everyday Americans who have used their skills to make democracy respond. The reader will see themselves in these examples of citizens who chose to be victorious participants rather than tranquil spectators in the arena of democracy. By the end of the book, you will have new confidence that citizen participation is the lifeblood of America -- and will be ready to make governments work for you, not the other way around.

National Bestseller Most women don't want to hear about breast cancer unless they have it and need to make some decisions, but these days news about breast cancer—the number one killer of women ages twenty to fifty-nine—is everywhere. Hope for a cure abounds. Celebrities have come forward to share their experiences and raise awareness. Chances are you know someone who has had it. But did you know that you make choices every day that bring you closer to breast cancer—or move you farther away? That in the majority of cases, cancer isn't up to fate, and there are ways to reduce your risk factors? That many of the things you've heard regarding the causes of breast cancer are flat-out false? There have been few solid guidelines on how to improve your breast health, lower your risk of getting cancer, optimize your outcomes if you're faced with a diagnosis, and make informed medical choices after treatment. Until now. "Dr. Funk writes Breasts: The Owner's Manual just like she talks: with conviction, passion, and a laser focus on you." —DR. MEHMET OZ, Host of The Dr. Oz Show "Breasts: The Owner's Manual will become an indispensable and valued guide for women looking to optimize health and minimize breast illness." —DEBU TRIPATHY, MD, Professor and Chair, Department of Breast Medical Oncology, University of Texas MD Anderson Cancer Center "Breasts: The Owner's Manual not only provides a clear path to breast health, but a road that leads straight to your healthiest self. As someone who has faced breast cancer, I suggest you follow it." —ROBIN ROBERTS, Coanchor, Good Morning America

. Society does not generally expect its farmers to be visionaries. Perhaps not, but longtime Maine farmer and homesteader Will Bonsall does possess a unique clarity of vision that extends all the way from the finer points of soil fertility and seed saving to exploring how we can transform civilization and make our world a better, more resilient place. In Will Bonsall's Essential Guide to Radical, Self-Reliant Gardening, Bonsall maintains that to achieve real wealth we first need to understand the economy of the land, to realize that things that might make sense economically don't always make sense ecologically, and vice versa. The marketplace distorts our values, and our modern dependence on petroleum in particular presents a serious barrier to creating a truly sustainable agriculture. For him the solution is, first and foremost, greater self-reliance, especially in the areas of food and energy. By avoiding any off-farm inputs (fertilizers, minerals, and animal manures), Bonsall has learned how to practice a purely veganic, or plant-based, agriculture—not from a strictly moralistic or philosophical perspective, but because it makes good business sense: spend less instead of making more. What this means in practical terms is that Bonsall draws upon the fertility of on-farm plant materials: compost, green manures, perennial grasses, and forest products like leaves and ramial wood chips. And he grows and harvests a diversity of crops from both cultivated and perennial plants: vegetables, grains, pulses, oilseeds, fruits and nuts—even uncommon but useful permaculture plants like groundnut (Apios). In a friendly, almost conversational way, Bonsall imparts a wealth of knowledge drawn from his more than forty years of farming experience. .My goal,. he writes, .is not to feed the world, but to feed myself and let others feed themselves. If we all did that, it might be a good beginning..
