This book provides a complete text on highway and traffic engineering for developing countries. It is aimed principally at students and young engineers from the developed world who have responsibility for such work in the third world, but will also be valuable for local highway engineers.

The book aims at presenting the topics of Bridge Engineering expressed in simple and lucid language. The presentation is comprehensive and methodical as well as interesting and easy to follow.

This well-known text-book now in its Nineteenth Edition, provides an up-to-date account of the basic principles on various functions and working of
