Quality Assurance in Distance Education and E-Learning: Challenges and Solutions from Asia documents the existing regulatory framework covering quality assurance (QA) systems in distance education (DE) in a number of Asian countries. It draws on the knowledge and experience of 16 selected DE/e-learning institutions of Asia and reveals the respective development of QA systems and procedures within these providers/programmes. The endeavour towards developing QA systems through various stages of testing and development is in response to the growing public concern for the quality of DE as well as staff aspirations for quality. This book,

through the selection of cases from the aforementioned institutions, covers a wide range of QA systems and perspectives of quality in DE. These cases present good practices in QA for DE/e-learning, analyse challenges in assuring the quality of DE products and services, offer possible solutions to meet those challenges, and present lessons for other DE providers.

Professional IT practitioners need not only the appropriate technical skills, but also a broad understanding of the context in which they operate. This book provides a unique introduction to: social, legal, financial, organizational and ethical issues in the context of the IT industry;

the role of professional codes of conduct and ethics; and key legislation. It is designed to accompany the BCS Professional Examination Core Diploma Module: Professional Issues in Information Systems Practice.

This book gives an introduction to the effective use of mathematical and statistical techniques in business operations, working from first principles and building towards a complete understanding of first-level undergraduate quantitative methods.

This book has been designed for the orientation and training of specialists in open and distance learning methods in Asia. It is the

outcome of the collaborative PANdora research and development initiative (2005–08) between 24 open and distance learning (ODL) institutions, government departments and non-governmental organizations in 13 Asian countries. The guidelines in the book have been designed in modular form so that selected sections can be combined according to users' needs and translated into local languages in keeping with the PANdora network's open resources philosophy.

This practical sourcebook has been specially prepared to give you an at-a-glance guide to quality video program-making on a modest budget. Emphasis

throughout is on excellence with economy; whether you are working alone or with a small multi-camera group. The well-tried techniques detailed here will steer you through the hazards of production, helping you to avoid those frustrating, time-wasting problems, and to create an effective video program. For many years Video Production Handbook has helped students and program-makers in a wide range of organizations. Now in its thoroughly revised 3rd edition, Video Production Handbook guides you step-by-step, explaining how to develop your initial program ideas, and build them into a successful working format. It covers the techniques of persuasive camerawork,

successful lighting and sound treatment, video editing...etc. You will find straightforward up-to-the-minute guidance with your daily production problems, and a wealth of practical tips based on the author's personal experience. In this extended edition, you will see how you can use quite modest chromakey facilities and visual effects to create the magic of virtual reality surroundings. Gerald Millerson's internationally acclaimed writings are based on a long and distinguished career with the BBC. His lecturing background includes TV production courses in the United States and UK. His other books for Focal Press have become standard works in a number of languages, and include his classic

The latest volume in the Advanced Biotechnology series provides an overview of the main product classes and platform chemicals produced by biotechnological processes today, with applications in the food, healthcare and fine chemical industries. Alongside the production of drugs and flavors as well as amino acids, bio-based monomers and polymers and biofuels, basic insights are also given as to the biotechnological processes yielding such products and how large-scale production may be enabled and improved. Of interest to biotechnologists, bio
