In this delightful romantic adventure, a 16-year-old overachiever learns how to seize the day. "I've got my entire life planned out for the next ten years — including my PhD and Pulitzer Prize," claims 16-year-old overachiever Vassar Spore, daughter of overachiever parents, who in true overachiever fashion named her after an elite women's college. Vassar expects her sophomore summer to include AP and AAP (Advanced Advanced Placement) classes. Surprise! Enter a world-traveling relative who sends her plans into a tailspin when she blackmails Vassar's parents into forcing their only child to backpack with her through Southeast Asia. On a journey from Malaysia to Cambodia to the remote jungles of Laos, Vassar sweats, falls in love, hones her outdoor survival skills — and uncovers a family secret that turns her whole world upside-down. Vassar Spore can plan on one thing: she'll never be the same again.

Les Marees Terrestres

This New York Times–bestselling author's memoir of her own heart attack is "a refresher course in handling life's meanest challenges with grace" (Library Journal). It begins late one afternoon in her kitchen. There is no collapse, no massive pain. Just a slight fluttering sensation in her chest, then chills, and finally, nausea. Probably nothing to worry about, the doctor assures her on the phone. It doesn't sound like a heart attack. But it is. Heart attacks in women can look and feel dramatically different than they do in men, which is why they often go undiagnosed. But heart disease is the number-one killer of American women—greater than all forms of cancer combined. When the doctor examines Lear the day after her episode, the verdict is shocking. So begins an account, filled with grace, humor, and ferocity, of her hard-won return to good health, beset by mysterious postsurgical complications and haunted by memories of her late husband when she finds herself in the same coronary unit in which she lost him all those years ago.

Advertising at War challenges the notion that advertising disappeared as a political issue in the United States in 1938 with the passage of the

Wheeler-Lea Amendment to the Federal Trade Commission Act, the result of more than a decade of campaigning to regulate the advertising industry. Inger L. Stole suggests that the war experience, even more than the legislative battles of the 1930s, defined the role of advertising in U.S. postwar political economy and the nation's cultural firmament. She argues that Washington and Madison Avenue were soon working in tandem with the creation of the Advertising Council in 1942, a joint effort established by the Office of War Information, the Association of National Advertisers, and the American Association of Advertising Agencies. Using archival sources, newspapers accounts, and trade publications, Stole demonstrates that the war elevated and magnified the seeming contradictions of advertising and allowed critics of these practices one final opportunity to corral and regulate the institution of advertising. Exploring how New Dealers and consumer advocates such as the Consumers Union battled the advertising industry, *Advertising at War* traces the debate over two basic policy questions: whether advertising should continue to be a tax-deductible business expense during the war, and whether the government should require effective standards and labeling for consumer products, which would render most advertising irrelevant. Ultimately the postwar climate of political intolerance and reverence for free enterprise quashed critical investigations into the advertising industry. While advertising could be criticized or lampooned, the institution itself became inviolable.

Being able to perform any task with full attention has become one of the great unspoken-about challenges of modern life. As our culture has become more high-speed, techno-stressed, information-cluttered and media-saturated, we are getting pushed out of our focus zones without even realising it. If you work in a modern office, it is likely you are suffering from 'information fatigue syndrome', which means that even naturally bright and creative people are rendered incapable of making swift decisions, problem-solving efficiently or able to maintain appropriate energy levels. Award-winning psychologist Lucy Jo Palladino offers practical solutions for anyone juggling too much, who finds themselves in a state of 'continuous partial attention', seemingly unable to do any one task with full concentration. In order to help people combat the negative aspects of 'always-on' information culture, Palladino has come up with a new set of skills that will help readers beat distraction and win the fight against information overload. She provides eight sets of 'keys' that will unlock your best attention and help you balance adrenaline levels, even when you are under pressure or facing dull tasks. Rooted in sports performance psychology, yet practical and user-friendly, Palladino's cutting-edge methods will help you stay focused and enhance your performance in all areas of daily life where concentration is required.

If you are a robot enthusiast who wants to quickly get the most out of Lego Mindstorms EV3, this is the book for you. Prior programming experience is useful to get the most out of this book, but not necessary.

My name is Maggie Raynard. After sixteen years being just plain me, suddenly, when I lose my temper, my fingers become weapons of mass destruction. Turns out I'm a semi-god, descended from Aphrodite. Sounds cool in theory, but when I accidentally put my ex-boyfriend in a coma, things go downhill pretty fast. Now some new guy named Mac Finnegan has made it his mission in life to continually piss me off. I'm stuck learning how to use my new powers while also dealing with regular high school problems, and with this annoying-and super-hot-guy all up in my business, I'm about to flip out. But it gets worse. I just learned there's this watchdog council of semis who keeps an eye out for any bad apples. They think I'm the baddest of the bunch and want to take me out before I do any more damage. My nemesis Mac might turn out to be my salvation, only he's got secrets of his own...and they may just kill us both.
